## KATA PENGANTAR

**Statistik Lingkungan Hidup Indonesia (SLHI)** merupakan seri publikasi tahunan Badan Pusat Statistik (BPS) yang telah diterbitkan sejak tahun 1982. Berbagai inovasi terus dilakukan dalam penyajian statistik lingkungan hidup dengan mengikuti perkembangan aturan dan rekomendasi yang sedang berlaku. Dari tahun 2015 hingga saat ini, penyajian statistik lingkungan hidup pada publikasi ini mengacu pada kerangka pengembangan statistik lingkungan hidup atau *Framework for The Development of Environment Statistics (FDES) 2013* yang telah dikembangkan oleh *United Nations Statistics Division (UNSD)*. FDES 2013 merupakan kerangka kerja konseptual dan statistik yang fleksibel, multiguna yang bersifat komprehensif dan integratif. Dalam kerangka kerja tersebut, terdapat 6 komponen, yaitu a) Kondisi dan Kualitas Lingkungan, b) Sumber Daya Lingkungan dan Penggunaannya, c) Residu, d) Peristiwa Ekstrem dan Bencana, e) Permukiman dan Kesehatan Lingkungan, serta f) Partisipasi, Pengelolaan dan Perlindungan Lingkungan.

Ragam data yang disajikan dalam publikasi SLHI 2023 bersumber dari Kementerian/Lembaga/Dinas terkait dan juga BPS. Luasnya cakupan statistik lingkungan hidup dan keterbatasan data yang tersedia menjadi tantangan yang terus diupayakan secara komprehensif dalam penyusunan publikasi ini.

Kepada semua pihak yang telah terlibat dan memberikan kontribusi dalam penyusunan publikasi ini, disampaikan penghargaan dan terima kasih. Semoga statistik yang disajikan memberi manfaat bagi banyak pihak untuk berbagai keperluan. Kritik dan saran dari semua pihak sangat diharapkan untuk penyempurnaan publikasi yang akan datang.

## **PREFACE**

**Environment Statistics of Indonesia** is an annual BPS-Statistics Indonesia publication published since 1982. Various innovations continue to be made in presenting environmental statistics by following developments in current regulations and recommendations. From 2015 until now, the publications refer to the Framework for the Development of Environment Statistics (FDES) 2013 developed by the United Nations Statistics Division (UNSD). FDES 2013 is a flexible, multipurpose conceptual and statistical framework that is comprehensive and integrative. In this framework, there are six components, namely a) Environmental Conditions and Quality, b) Environmental Resources and Their Use, c) Residuals, d) Extreme Events and Disasters, e) Human Settlements and Environmental Health, and f) Environmental Protection, Management and Engagement.

The various data presented in the Environment Statistics of Indonesia 2023 are sourced from Ministries/Institutions and BPS-Statistics Indonesia. The scope of environmental statistics and the limited data available are challenges that continue to be overcome comprehensively in preparing this publication.

To all those who contributed to the preparation of this publication, appreciation and thanks are expressed. Hopefully the statistics presented will benefit many parties for various purposes. Responses and suggestions from users of this publication are highly expected for future editions.

## PENJELASAN UMUM/EXPLANATORY NOTES

Tanda-tanda, satuan-satuan, dan lain-lainnya yang digunakan dalam publikasi ini adalah sebagai berikut :

*Symbols, measurement units, and acronyms which are used in this publication, are as follows :*

### I. TANDA-TANDA/SYMBOLS

|                                                                           |     |
|---------------------------------------------------------------------------|-----|
| Data tidak tersedia/ <i>Data not available</i> .....                      | ... |
| Tidak ada atau nol/ <i>Null or zero</i> .....                             | -   |
| Data dapat diabaikan/ <i>Data negligible</i> .....                        | 0   |
| Tanda decimal/ <i>Decimal point</i> .....                                 | ,   |
| Data tidak dapat ditampilkan/ <i>Not applicable</i> .....                 | NA  |
| Angka estimasi/ <i>Estimated figures</i> .....                            | e   |
| Angka diperbaiki/ <i>Revised figures</i> .....                            | r   |
| Angka sementara/ <i>Preliminary figures</i> .....                         | x   |
| Angka sangat sementara/ <i>Very preliminary figures</i> .....             | xx  |
| Angka sangat sangat sementara/ <i>Very very preliminary figures</i> ..... | xxx |

### II. SATUAN/UNITS

|                                                     |                                                       |
|-----------------------------------------------------|-------------------------------------------------------|
| barel/ <i>barrel</i> .....                          | 158,99 liter/ <i>litres</i> = 1/6,2898 m <sup>3</sup> |
| hektar (ha)/ <i>hectare (ha)</i> .....              | 10 000 m <sup>2</sup>                                 |
| kilometer (km)/ <i>kilometres (km)</i> .....        | 1 000 meter/ <i>meters</i> (m)                        |
| knot/ <i>knot</i> .....                             | 1,8523 km/jam ( <i>km/hour</i> )                      |
| kuintal (ku)/ <i>quintal (qu)</i> .....             | 100 kg                                                |
| KWh .....                                           | 1 000 Watt hour                                       |
| MWh .....                                           | 1 000 KWh                                             |
| liter (untuk beras)/ <i>litre (for rice)</i> .....  | 0,80 kg                                               |
| MMSCF .....                                         | 1/35,3 m <sup>3</sup>                                 |
| metrik ton (m.ton)/ <i>metric ton (m.ton)</i> ..... | 0,98421 long ton = 1 000 kg                           |
| ons/ <i>ounce</i> .....                             | 28,31 gram/ <i>grams</i>                              |
| ton .....                                           | 1 000 kg                                              |

Satuan lain / *Other units* : buah, dus, butir, helai/lembar, kaleng, batang, pulsa, ton kilometer (ton-km), jam, menit, persen (%) / *unit, pack, pieces, sheet, tin, pulse, ton-kilometres (ton-km), hour, minute, percent (%)*

Perbedaan angka di belakang koma disebabkan oleh pembulatan angka /  
*The difference in decimal numbers is caused by rounding*

### III. SINGKATAN/ABBREVIATION

|          |                                                                                            |
|----------|--------------------------------------------------------------------------------------------|
| ABKT     | : Areal Bernilai Konservasi Tinggi/<br><i>High Conservation Value Area</i>                 |
| ADB      | : <i>Asian Development Bank</i>                                                            |
| Admuduk  | : Administrasi Kependudukan/ <i>Population Administration</i>                              |
| ADO      | : <i>Automatic Diesel Oil</i>                                                              |
| AKB      | : Angka Kematian Bayi/ <i>Infant Mortality Rate (IMR)</i>                                  |
| AMDAL    | : Analisis Dampak Lingkungan/<br><i>Environmental Impact Assessment</i>                    |
| AOC      | : <i>Aircraft Operator Certificate</i>                                                     |
| APBD     | : Anggaran Pendapatan dan Belanja Daerah/<br><i>Local Government Budget</i>                |
| APBN     | : Anggaran Pendapatan dan Belanja Negara/<br><i>Central Government Budget</i>              |
| API      | : <i>Annual Parasite Incidence</i>                                                         |
| APL      | : Areal Penggunaan Lain/ <i>Other Use Area</i>                                             |
| ASEAN    | : <i>Association of South-East Asian Nations</i>                                           |
| Avgas    | : <i>Aviation Gasoline</i>                                                                 |
| Avtur    | : <i>Aviation Turbine</i>                                                                  |

## Pendahuluan

---

*Introduction*

## 1.1 Latar Belakang

Sampai saat ini, isu lingkungan yang berkelanjutan semakin marak mewarnai pemberitaan media global, baik di negara maju maupun negara berkembang. Peningkatan kesadaran manusia terhadap pentingnya jasa lingkungan dan kelestariannya, telah menjadikan lingkungan menjadi isu yang banyak dibicarakan. Seperti diketahui bersama bahwa pembangunan ekonomi yang menjadi tujuan bagi sebagian besar negara di dunia, justru berbanding terbalik dengan kualitas lingkungan hidup yang ada. Pembangunan ekonomi yang dilakukan lebih sering berdampak negatif terhadap lingkungan hidup dibandingkan menguntungkan lingkungan hidup. Seiring berkembangnya pembangunan di bidang ekonomi, maka kebutuhan akan energi, lahan, dan sumber daya alam juga semakin meningkat, sehingga menyebabkan terjadinya degradasi lingkungan hidup.

Pemantauan lingkungan hidup yang dilakukan oleh para pengelola lingkungan hidup membutuhkan informasi mengenai lingkungan hidup. Informasi tersebut untuk memotret kondisi lingkungan pada suatu waktu, baik tingkat kerusakan yang terjadi, perbaikan yang telah dilakukan, maupun langkah-langkah yang perlu

## 1.1 Background

*Currently, environmental sustainability is a topical issue that receives plenty of attention from the global media, both in the developed and developing countries. Increasing human awareness of the importance of environmental services and sustainability has made the environment an issue that is much discussed. It is inevitable that economic development is the goal for most countries in the world, it is inversely proportional to the environment quality. Economic development is having more a negative impact on the environment than the environment benefits. Along with growing of economic development, the need for energy, land, and natural resources have also increased, thus causing environmental degradation.*

*Environmental monitoring carried out by the environmental managers need information about the environment. Such information will portray the environmental conditions at certain time, both the evaluate the extent of damage that already occurred, improvements that had been made, and the steps the need to prepared as an input for environmental planning in the future. Policy makers need to incorporate consideration on environmental factors in all of its activities, supported by information of the environment with a*

disusun sebagai bahan masukan bagi perencanaan lingkungan di waktu mendatang. Para pembuat kebijakan perlu memasukkan faktor lingkungan dalam semua pertimbangan kegiatannya sehingga informasi tentang lingkungan hidup yang akurat, lengkap, tepat waktu, dan berkelanjutan sangat diperlukan.

Untuk memperoleh gambaran yang jelas mengenai permasalahan yang terjadi pada lingkungan hidup, dibutuhkan indikator yang dapat mengukur kualitas lingkungan hidup. Statistik sebagai alat bantu, sering digunakan untuk melihat fenomena dan perilaku lingkungan hidup perlu terus menerus disusun dan dikembangkan dengan metodologi yang dapat dipertanggungjawabkan.

### 1.2 Kerangka Kerja

Publikasi Statistik Lingkungan Hidup Indonesia 2023 menggunakan kerangka kerja Framework for the Development of Environment Statistics (FDES) 2013, yaitu kerangka kerja yang konseptual dan statistik yang fleksibel, komprehensif dan integratif. FDES 2013 menyatukan data dari berbagai bidang subyek dan sumber yang relevan. Sifatnya luas dan holistik mencakup masalah dan aspek lingkungan yang relevan untuk analisis

*great deal of accuracy, complete, timely, and sustainable.*

*To obtain a clear picture of the problems that occurred in the environment, it needs an indicator that can measure the environment quality. Statistics as a tool that is often used to look at the phenomenon and the behavior of the environment need to be constantly prepared and developed with reliable methodology.*

### 1.2 Framework

*The Environment Statistics of Indonesia 2023 publication uses the Framework for the Development of Environment Statistics (FDES) 2013, namely a conceptual and statistical framework that is flexible, comprehensive and integrative. FDES 2013 brings together data from a variety of subject areas and relevant sources. Its broad and holistic nature covers environmental issues and aspects relevant for policy analysis and decision making by applying*

kebijakan dan pengambilan keputusan dengan menerapkannya pada isu-isu lintas sektoral seperti perubahan iklim statistik lingkungan.

FDES 2013 terdiri dari 458 statistik lingkungan yang terbagi dalam struktur yang terdiri atas enam komponen, masing-masing komponen dipecah dalam subkomponen dan topik statistik. Enam komponen tersebut meliputi kondisi dan kualitas lingkungan; ketersediaan dan pemanfaatan sumber daya lingkungan dan aktivitas manusia yang terkait; pemanfaatan lingkungan sebagai tempat pembuangan limbah dan aktivitas manusia yang terkait; kejadian ekstrem dan bencana; permukiman dan kesehatan lingkungan; serta ukuran sosial dan ekonomi untuk perlindungan dan pengelolaan lingkungan hidup. FDES 2013 menetapkan daftar statistik yang komprehensif, yaitu kelompok utama statistik lingkungan hidup yang dapat digunakan untuk mengukur topik-topik statistik. Topik statistik mewakili aspek kuantitatif dari komponen-komponen dan dikelompokkan ke dalam sub-komponen, dengan mempertimbangkan jenis dan sumber statistik yang diperlukan untuk menggambarkan keadaannya.

Kelompok dasar ini diatur dalam tiga tingkatan, berdasarkan tingkat relevansi, ketersediaan dan pengembangan metodologi statistik.

*it to cross-sectoral issues such as climate change environmental statistics.*

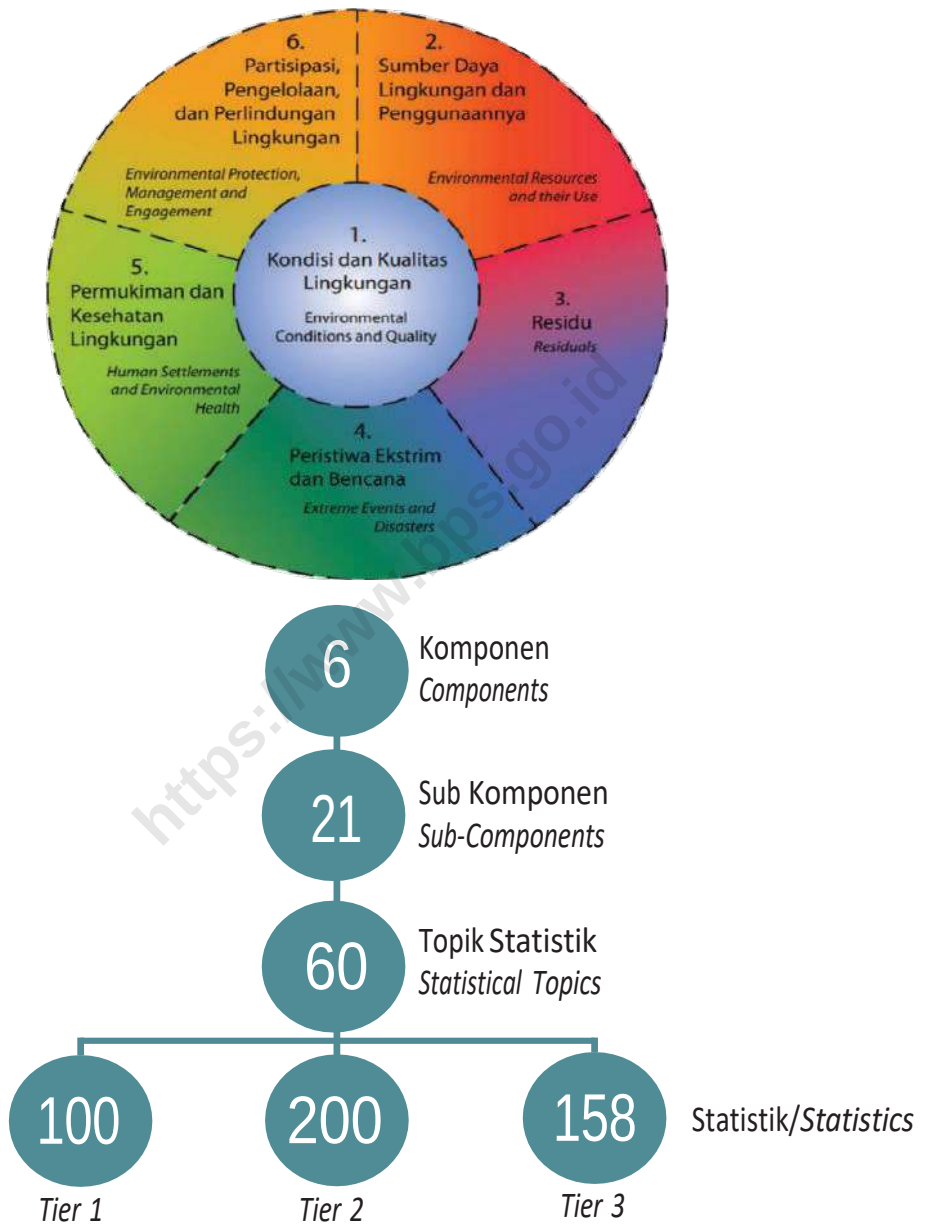

*FDES 2013 consists of 458 environmental statistics divided into structures consisting of six components, each component divided into sub-components and statistical topics. These six components include environmental conditions and quality; environmental resources availability and utilization and related human activities; environmental utilization as a waste disposal place and related human activities; extreme events and disasters; settlement and environmental health; as well as social and economic measures for environmental protection and management. FDES 2013 determined a comprehensive statistics list, ie main group of environmental statistics that can be used to measure statistical topics. The statistical topics represent quantitative aspects of components and are grouped into sub-components, by considering the types and sources of statistics needed to describe the situation.*

*These basic group is organized into three levels, based on degree of relevancy, statistical methodology availability and development. Within this scope, the main group of environmental statistics has been identified as Tier 1 which is a high priority environmental statistic to be collected in short term and relevant in most countries. International alignment by definition, classification,*

## STATISTIK LINGKUNGAN HIDUP INDONESIA 2023

Dalam lingkup ini, kelompok utama statistik lingkungan hidup telah diidentifikasi sebagai Tier 1 yang merupakan statistik lingkungan hidup yang mempunyai prioritas tinggi untuk dikumpulkan dalam jangka pendek dan relevan hampir di kebanyakan negara. Keselarasan internasional secara definisi, klasifikasi dan metode pengumpulan data untuk statistik ini telah tersedia untuk memfasilitasi produksi data yang memiliki keterbandingan internasional. Cakupannya secara bertahap dapat diperluas ke statistik yang terkandung dalam tingkat 2 dan tingkat 3 yang membutuhkan lebih banyak waktu, sumber daya dan metodologi yang masih perlu dikembangkan.

*and data collection methods for these statistics have been available to facilitate the data production that internationally comparable. Gradually, the scope can be extended to statistics contained in levels 2 and 3 that require more time, resources, and methodologies that still need to be developed.*

## **Kondisi dan Kualitas Lingkungan**

*Environmental Conditions and Quality*

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

### PENJELASAN TEKNIS

1. **Meteorologi**  
Meteorologi adalah gejala alam yang berkaitan dengan cuaca.
2. **Klimatologi**  
Klimatologi adalah gejala alam yang berkaitan dengan iklim dan kualitas udara.
3. **Geofisika**  
Geofisika adalah gejala alam yang berkaitan dengan gempa bumi tektonik, tsunami, gravitasi, magnet bumi, kelistrikan udara, dan tanda waktu.
4. **Unsur Iklim**  
Unsur iklim mencakup suhu, kelembapan udara, tekanan udara, angin, dan curah hujan.
5. **Suhu Udara**  
Suhu udara merupakan suhu panas/dinginnya udara di suatu tempat pada waktu tertentu.
6. **Curah Hujan**  
Curah hujan adalah jumlah air hujan yang turun pada daerah tertentu dalam waktu tertentu.
7. **Hari Hujan**  
Hari hujan adalah periode 24 jam dimana terkumpul curah hujan setinggi 0.5 mm atau lebih (satu hari hujan).
8. **Penyinaran Matahari**  
Penyinaran matahari adalah lamanya matahari bersinar sampai permukaan bumi dalam periode satu hari, diukur dalam jam.
9. **Kelembapan Udara**  
Kelembapan udara adalah konsentrasi uap air di udara (atmosfer).
10. **Tekanan Udara**  
Tekanan udara adalah tenaga yang bekerja untuk menggerakkan massa udara dalam setiap satuan luas tertentu. Tekanan udara akan berbanding terbalik dengan ketinggian suatu tempat sehingga semakin tinggi tempat dari permukaan laut semakin rendah tekanan udaranya.
11. **Kecepatan Angin**  
Kecepatan angin merupakan sebuah kuantitas atmosferik fundamental. Kecepatan angin disebabkan oleh pergerakan angin dari tekanan tinggi ke tekanan rendah, biasanya karena perubahan suhu.

### TECHNICAL NOTES

1. **Meteorology**  
*Meteorology is a natural phenomena related to the weather.*
2. **Climatology**  
*Climatology is a natural phenomena related to the climate and air quality.*
3. **Geophysics**  
*Geophysics are natural phenomena related to tectonic earthquakes, tsunamis, gravity, earth magnetism, air electricity, and time signs.*
4. **Climate Elements**  
*Climate elements include temperature, humidity, air pressure, wind, and rainfall.*
5. **Temperature**  
*Temperature is the temperature of the hot/cold air in a place at a certain time.*
6. **Rainfall**  
*Rainfall is the quantity of rain falling within a given area in a given time.*
7. **Rainy Day**  
*Rainy day is a 24 hour period where rainfall is as high as 0.5 mm or more (one rainy day).*
8. **Solar Radiation**  
*Solar radiation is the length of the sun shines to the surface of the earth in a period of one day, measured in hours.*
9. **Humidity**  
*Humidity is the concentration of water vapor in the air (atmosphere).*
10. **Air Pressure**  
*Air pressure is the force exerted into a surface by the weight of the air. The air pressure will be inversely proportional to the height of a place so that the higher the place from sea level the lower the air pressure.*
11. **Wind Velocity**  
*Wind velocity is fundamental atmospheric quantity caused by air moving from high to low pressure, usually due to changes in temperature.*

12. **Daerah Aliran Sungai**

Daerah Aliran Sungai adalah suatu wilayah daratan yang merupakan satu kesatuan dengan sungai dan anak-anak sungainya, yang berfungsi menampung, menyimpan, dan mengalirkan air yang berasal dari curah hujan ke danau atau ke laut secara alami, yang batas di darat merupakan pemisah topografis dan batas laut secara alami, yang batas di darat merupakan pemisah topografis dan batas laut sampai dengan daerah perairan yang masih terpengaruh aktivitas daratan (SNI 6738:2015 Tentang Perhitungan debit andalan sungai dengan kurva durasi debit).

13. **Pos Duga Air**

Pos duga air merupakan bangunan di sungai yang dipilih untuk mengamati tinggi muka air secara sistematis agar dapat berfungsi untuk memantau fluktuasi muka air yang dapat ditransfer ke dalam debit dengan menggunakan RC (Rating Curve). Biasanya pos duga air berada di desa atau dusun. Pemilihan lokasi pengukuran air sungai berdasarkan SNI 03-2226-1991 Rev.2004 tentang tata cara pemilihan lokasi pos duga air di sungai.

14. **Debit**

Debit merupakan jumlah volume air yang mengalir melewati suatu penampang melintang saluran atau sungai per satuan waktu (SNI 6738:2015 Tentang Perhitungan debit andalan sungai dengan kurva durasi debit).

15. **Debit Ekstrem Sesaat**

Debit ekstrem sesaat ( $\text{m}^3/\text{det}$ ) yaitu debit banjir sesaat maksimum/minimum atau debit maksimum/minimum tahunan yang terjadi sesaat.

16. **Rata-Rata Tahunan Aliran Sungai**

Rata-Rata tahunan aliran sungai ( $\text{m}^3/\text{det}$ ) yaitu debit rata-rata tahunan yang dihitung dari debit rata-rata bulanan.

17. **Rata-Rata Aliran**

Rata-rata aliran ( $\text{lt}/\text{det}/\text{km}^2$ ) adalah debit rata-rata dalam satu bulan persatuan luas ( $\text{km}^2$ ) dari daerah aliran sungai yang bersangkutan.

18. **Tinggi Aliran**

Tinggi aliran (mm) adalah tebal aliran rata-rata dalam satu tahun di dalam daerah aliran sungai.

12. **Watershed**

A watershed is a land area that is an integral part of a river and its tributaries, which functions to accommodate, store and flow water that comes from rainfall to lakes or to the sea naturally, the boundary on land is a topographic and boundary separator sea naturally, the boundary on land is the topographical separator and the sea boundary up to the waters that are still affected by land activities (SNI 6738: 2015 concerning Calculation of river mainstay discharge with discharge duration curves).

13. **Heading Water**

Heading water is a building on the river that is chosen to observe the water level systematically so that it can function to monitor water level fluctuations that can be transferred into the discharge using RC (Rating Curve). Usually, the alleged water post is in a village or hamlet. The selection of river water measurement locations based on SNI 03-2226-1991 Rev.2004 concerning the procedures for selecting the location of the alleged water post in the river.

14. **Discharge**

Discharge is the volume of water flowing through a cross-section of a channel or river per unit time (SNI 6738: 2015 concerning the calculation of a reliable river discharge with a discharge duration curve).

15. **Instant Moment Extreme Discharge**

Instant moment extreme discharge ( $\text{m}^3/\text{sec}$ ) is maximum/minimum instantaneous flood discharge or annual maximum/minimum discharge that occurs instantaneously.

16. **Average Annual River Flow**

Average annual river flow ( $\text{m}^3/\text{sec}$ ) is annual average discharge calculated from monthly average discharge.

17. **Average Flow**

Average flow ( $\text{lt}/\text{sec}/\text{km}^2$ ) is the average flow rate in one month of large unity ( $\text{km}^2$ ) of the watershed in question.

18. **Flow Height**

Flow height (mm) is the average flow thickness of flow in one year in a watershed.

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

19. **Volume Air**  
Volume air (juta m<sup>3</sup>) adalah jumlah volume air yang mengalir dalam satu tahun.
20. **Posisi Indonesia**
- Secara astronomis, Indonesia terletak antara 6° 04' 30" Lintang Utara dan 11° 00' 36" Lintang Selatan dan antara 94° 58' 21" sampai dengan 141° 01' 10" Bujur Timur dan dilalui oleh garis ekuator atau garis khatulistiwa yang terletak pada garis lintang 0°.
  - Berdasarkan posisi geografisnya, negara Indonesia memiliki batas-batas: Utara–Negara Malaysia, Singapura, Vietnam, Filipina, Thailand, Palau, dan Laut Cina Selatan; Selatan–Negara Australia, Timor Leste, dan Samudera Hindia; Barat–Samudera Hindia; Timur–Negara Papua Nugini dan Samudera Pasifik. Batas-batas tersebut ada pada 111 pulau terluar yang perlu dijaga dan dikelola dengan baik. Pulau-pulau tersebut digunakan untuk menentukan garis pangkal batas wilayah negara Indonesia dengan negara lain (Keputusan Presiden Nomor 6 Tahun 2017 tentang Penetapan Pulau-Pulau Kecil Terluar).
  - Berdasarkan letak geografisnya, kepulauan Indonesia berada di antara Benua Asia dan Benua Australia, serta di antara Samudera Hindia dan Samudera Pasifik.
21. **Pesisir**  
Pesisir merupakan daerah pertemuan antara darat dan laut; ke arah darat meliputi bagian daratan, baik kering maupun terendam air, yang masih dipengaruhi sifat-sifat laut seperti pasang surut, angin laut, dan perembesan air asin; sedangkan ke arah laut meliputi bagian laut yang masih dipengaruhi oleh proses-proses alami yang terjadi di darat seperti sedimentasi dan aliran air tawar, maupun yang disebabkan oleh kegiatan manusia di darat seperti penggundulan hutan dan pencemaran.
22. **Kecamatan Pesisir**  
Kecamatan pesisir adalah kabupaten/kota yang memiliki garis pantai/bersentuhan langsung dengan laut
23. **Desa Pantai**  
Desa pantai adalah desa di wilayah kecamatan pesisir yang langsung bersentuhan dengan laut (memiliki garis pantai).
19. **Water Volume**  
*Water volume (million m<sup>3</sup>) is the amount of water flowing in one year.*
20. **Indonesian Position**
- *Astronomically, Indonesia is located between 6° 04' 30" North latitude and 11° 00' 36" South latitude, and between 94° 58' 21" and 141° 01' 10" East longitude, and lies on equator line located at 0° latitude line.*
  - *In terms of geographic position, Indonesia has boundaries as follows: North–Malaysia, Singapore, Vietnam, Philippines, Thailand, Palau, and South China Sea; South–Australia, Timor Leste, and Indian Ocean; West Indian Ocean; East–Papua New Guinea and Pacific Ocean. The boundaries spread on 111 outermost islands of Indonesia that must be well managed and guarded. The outermost islands are immediately adjacent to other countries and have strategic sovereignty values that should be strengthened (Presidential Decree No. 6 of 2017 on Small Outermost Islands Determination).*
  - *In terms of geographic location, Indonesia is located between Asian Continent and Australian Continent, and between Indian Ocean and Pasific Ocean.*
21. **Coastal**  
*Coastal is an area of interface between land and sea, landward include part of land, either dry or immersed in water, which is still influenced traits such as tidal sea, the sea breeze, and the seepage of salt water, while covering the sea towards the sea which is still influenced by the natural processes that occur on land, such as sedimentation and flow of fresh water, and caused by human activities on land such as deforestation and pollution.*
22. **Coastal District**  
*Coastal district is a regency/city that has a coastline/is in direct contact with the sea.*
23. **Village with Beach**  
*Village with beach is a village in a coastal sub-district that is directly in contact with the sea (has a coastline).*

24. **Desa Bukan Pantai**  
Desa bukan pantai adalah desa di wilayah kecamatan pesisir yang tidak langsung bersentuhan dengan laut (tidak memiliki garis pantai)
25. **Ekosistem**  
Ekosistem adalah tatanan unsur lingkungan hidup yang merupakan kesatuan utuh menyeluruh dan saling mempengaruhi dalam membentuk keseimbangan, stabilitas, dan produktivitas lingkungan hidup.
26. **Sumber Daya Alam**  
Sumber daya alam adalah unsur lingkungan hidup yang terdiri atas sumber daya hayati dan nonhayati yang secara keseluruhan membentuk kesatuan ekosistem.
27. **Konservasi Sumber Daya Alam**  
Konservasi sumber daya alam adalah pengelolaan sumber daya alam untuk menjamin pemanfaatannya secara bijaksana serta kesinambungan ketersediaannya dengan tetap memelihara dan meningkatkan kualitas nilai serta keanekaragamannya.
28. **Kawasan Konservasi Laut**  
Kawasan konservasi laut adalah daerah pesisir dan laut yang meliputi terumbu karang, hutan mangrove, lamun, atau habitat lainnya, yang secara hukum dilindungi sebagian atau semua lingkungan di sekitarnya.
29. **Terumbu Karang**  
Terumbu karang adalah sekumpulan hewan karang yang bersimbiosis dengan sejenis tumbuhan alga yang disebut *zooxanthellae*.
30. **Hutan**  
Hutan adalah suatu kesatuan ekosistem berupa hamparan lahan berisi sumber daya alam hayati yang didominasi pepohonan dalam persekutuan alam lingkungannya, yang satu dengan lainnya tidak dapat dipisahkan.
31. **Kawasan Hutan**  
Kawasan hutan adalah wilayah tertentu yang ditunjuk dan/atau ditetapkan oleh pemerintah untuk dipertahankan keberadaannya sebagai hutan tetap.
24. **Village without Beach**  
*Village without beach is a village in the coastal sub-district that is not directly in contact with the sea (does not have a coastline).*
25. **Ecosystem**  
*Ecosystem is structure of environmental elements that are integral unity and mutual influence in equilibrium, stability, and environmental productivity.*
26. **Natural Resources**  
*Natural resources are the environmental elements that cover of biological and non-biological resources that establish the overall component of ecosystems.*
27. **Natural Resources Conservation**  
*Natural resources conservation is the management of natural resources to guarantee its utilization wisely and continuity of its availability by perpetuating and increasing value quality and its variety.*
28. **Marine Conservation Area**  
*Marine conservation area is a coastal marine area covering coral reef, mangrove, seagrass, or other habitats, which has been reserved by law to protect part or the entire enclosed environment.*
29. **Coral Reef**  
*Coral reefs are a group of animals with a sort of symbiotic reef algae called *zooxanthellae* plants.*
30. **Forest**  
*Forest is an ecosystem unit in the form of a stretch of land containing biological natural resources which is dominated by deep trees the natural alliance of the environment, which cannot be separated from one another.*
31. **Forest Area**  
*Forest Area is a specific territory determined and/ or decided by the government as a permanent forest.*

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

### 32. **Penunjukan Kawasan Hutan**

- Kawasan hutan Indonesia ditetapkan oleh Menteri Lingkungan Hidup dan Kehutanan dalam bentuk Surat Keputusan Menteri Lingkungan Hidup dan Kehutanan tentang Penunjukan Kawasan Hutan dan Perairan Provinsi.
- Penunjukan Kawasan Hutan ini disusun berdasarkan hasil pemaduserasian antara Rencana Tata Ruang Wilayah Provinsi (RTRWP) dengan Tata Guna Hutan Kesepakatan (TGHK).
- Penunjukan kawasan hutan mencakup pula kawasan perairan yang menjadi bagian dari Kawasan Suaka Alam (KSA) dan Kawasan Pelestarian Alam (KPA).
- Berdasarkan Undang-Undang No. 41 Tahun 1999 tentang Kehutanan, kawasan hutan dibagi ke dalam kelompok Hutan Konservasi, Hutan Lindung, dan Hutan Produksi.

### 33. **Pemanfaatan Hutan**

Pemanfaatan hutan adalah kegiatan untuk memanfaatkan kawasan hutan, memanfaatkan jasa lingkungan, memanfaatkan hasil hutan kayu dan bukan kayu, memungut hasil hutan kayu dan bukan kayu serta mengolah dan memasarkan hasil hutan secara optimal dan adil untuk kesejahteraan masyarakat dengan tetap menjaga kelestariannya.

### 34. **Pemanfaatan Kawasan**

Pemanfaatan kawasan adalah kegiatan untuk memanfaatkan ruang tumbuh sehingga diperoleh manfaat lingkungan, manfaat sosial, dan manfaat ekonomi secara optimal dengan tidak mengurangi fungsi utamanya.

### 35. **Hutan Lindung**

Hutan Lindung adalah kawasan hutan yang mempunyai fungsi pokok sebagai perlindungan sistem penyangga kehidupan untuk mengatur tata air, mencegah banjir, mengendalikan erosi, mencegah intrusi air laut, dan memelihara kesuburan tanah.

### 36. **Hutan Produksi**

Hutan Produksi adalah kawasan hutan yang mempunyai fungsi pokok memproduksi hasil hutan. Hutan produksi terdiri dari Hutan Produksi Tetap (HP), Hutan Produksi Terbatas (HPT), dan Hutan Produksi yang dapat dikonversi.

### 32. **Designation of Forest Area**

- Indonesian forest area is determined by the Minister of Environment and Forestry in the format of Ministerial Decree on the Designation of Provincial Forest Area and Inland Water, Coastal, and Marine Ecosystem.
- The designation of Forest Area is formulated based on integrated and harmonized of Provincial Spatial Planning and Forest Land Use by Consensus.
- The designation of forest area in some cases also cover inland water, coastal, and marine ecosystem that may become part of Sanctuary Reserve Area and Nature Conservation Area.
- According to the Act on Forestry No. 41/1999, forest area is categorized as Conservation Forest, Protection Forest, and Production Forest.

### 33. **Forest Utilization**

Forest utilization is an activity to utilize forest areas, utilize environmental services, utilize timber and non-timber forest products, collect timber and non-timber forest products and process and market forest products optimally and fairly for the welfare of the community while maintaining their sustainability.

### 34. **Area Utilization**

Area utilization is an activity to utilize the growing space so that environmental benefits, social benefits, and economic benefits are optimally obtained without reducing its main function.

### 35. **Protection Forest**

Protection Forest is a forest area designated to serve life support system, maintain hydrological system, prevent flood, erosion control, seawater intrusion, and maintain soil fertility.

### 36. **Production Forest**

Production Forest is a forest area designated mainly to promote sustainable forest production. Production forest consists of permanent production forest, limited production forest, and convertible production forest.

### 37. **Hutan Produksi Tetap**

Hutan Produksi Tetap (HP) adalah kawasan hutan dengan faktor-faktor kelas lereng, jenis tanah dan intensitas hujan setelah masing-masing dikalikan dengan angka penimbang mempunyai jumlah nilai dibawah 125, di luar kawasan lindung, hutan suaka alam, hutan pelestarian alam dan taman buru.

### 38. **Hutan Produksi Terbatas**

Hutan Produksi Terbatas (HPT) adalah kawasan hutan dengan faktor-faktor kelas lereng, jenis tanah dan intensitas hujan setelah masing-masing dikalikan dengan angka penimbang mempunyai jumlah nilai antara 125-174, di luar kawasan lindung, hutan suaka alam, hutan pelestarian alam dan taman buru.

### 39. **Hutan Produksi yang Dapat Dikonversi**

Hutan Produksi yang Dapat Dikonversi (HPK) adalah kawasan hutan yang secara ruang dicadangkan untuk digunakan bagi pembangunan di luar kehutanan.

### 40. **Areal Penggunaan Lain**

Areal Penggunaan Lain (APL) adalah tanah negara yang diperuntukkan bagi kegiatan non kehutanan.

### 41. **Penutupan Lahan**

Penutupan lahan merupakan gambaran obyek (kenampakan biofisik) di permukaan bumi yang diperoleh dari sumber data terpilih (umumnya data penginderaan jauh) dan dikelompokkan ke dalam kelas-kelas tutupan yang sesuai dengan kebutuhannya. Kelas penutupan lahan dibagi menjadi dua bagian besar, yaitu daerah bervegetasi dan daerah tak bervegetasi.

### 42. **Neraca Lahan**

Neraca lahan adalah neraca yang menggambarkan luasan lahan dan perubahan luasan lahan tersebut lebih dari satu periode waktu dimana pengukurannya menggunakan satuan hektar atau meter persegi. Data-data terkait tutupan lahan dan penggunaan lahan dapat dimanfaatkan untuk menyusun neraca lahan.

### 43. **Neraca Tutupan Lahan**

Neraca fisik tutupan lahan menunjukkan luas tutupan lahan saat dalam kondisi stok awal dan stok akhir untuk masing-masing klasifikasi tutupan lahan.

### 37. **Permanent Production Forest**

*Permanent Production Forest is a forest area with factors of slope class, soil type and rainfall intensity after each multiplied by the weighing number having a value below 125, outside the protected area, nature reserve forest, nature conservation forest and hunting park.*

### 38. **Limited Production Forest**

*Limited Production Forest is a forest area with factors of slope class, soil type and rainfall intensity after each multiplied by the weighing number having a value between 125-174, outside the protected area, nature reserve forest, nature conservation forest and hunting park.*

### 39. **Convertible Production Forest**

*Convertible Production Forest is a forest area that is space reserved for use for development outside forestry.*

### 40. **Other Use Area**

*Other Use Area is state land intended for non-forestry activities.*

### 41. **Land Cover**

*Land cover is a picture of objects (biophysical appearance) on the surface of the earth obtained from selected data sources (generally remote sensing data) and grouped into classes of cover according to their needs. Land cover class is divided into two major parts, namely vegetation and non-vegetation areas.*

### 42. **Land Accounts**

*Land accounts describe the land area and land area change over a period of time in which the measurement is in units of hectares or square meters. Land cover and land use data can be used to compile land accounts.*

### 43. **Land Cover Accounts**

*The physical land cover accounts show the area of land cover in opening stock and closing stock for each land cover classification.*

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

### 44. Perubahan pada Stok Tutupan Lahan

Perubahan pada stok tutupan lahan disebabkan oleh beberapa faktor, diantaranya penambahan terkelola, penambahan alami, pengurangan terkelola, pengurangan alami, dan penilaian kembali.

- Penambahan terkelola mewakili penambahan area pada jenis klasifikasi tutupan lahan tertentu akibat adanya aktivitas manusia.
- Penambahan alami adalah penambahan area tutupan lahan dikarenakan terjadinya proses alam, seperti pembenihan, penyemaian, dan pertumbuhan tunas alami.
- Pengurangan terkelola mewakili pengurangan area pada jenis klasifikasi tutupan lahan tertentu akibat adanya aktivitas manusia.
- Pengurangan alami dicatat sebagai pengurangan area tutupan lahan terkait adanya peristiwa alam.
- Penilaian kembali, dapat berupa revisi ke atas atau ke bawah, di mana hal ini merefleksikan perubahan akibat adanya informasi terkini yang membuat adanya penilaian kembali terhadap luas area suatu klasifikasi tutupan lahan, contohnya terdapat citra satelit baru atau interpretasi baru terhadap citra satelit.

### 45. Hutan Konservasi

Hutan Konservasi adalah kawasan hutan dengan ciri khas tertentu yang mempunyai fungsi pokok pengawetan keanekaragaman tumbuhan dan satwa serta ekosistemnya. Hutan Konservasi terdiri dari Kawasan Suaka Alam, Kawasan Pelestarian Alam, dan Taman Buru.

### 46. Kawasan Suaka Alam

Kawasan Suaka Alam (KSA) adalah kawasan dengan ciri khas tertentu, baik di darat maupun di perairan yang mempunyai fungsi pokok sebagai kawasan pengawetan keanekaragaman tumbuhan dan satwa serta ekosistemnya, yang juga berfungsi sebagai wilayah sistem penyangga kehidupan. Kawasan suaka alam berupa Cagar Alam (CA) dan Suaka Margasatwa (SM).

### 47. Cagar Alam

Cagar Alam adalah Kawasan Suaka Alam yang karena keadaan alamnya mempunyai kekhasan/keunikan jenis tumbuhan dan/atau keanekaragaman tumbuhan beserta gejala alam dan ekosistemnya yang memerlukan upaya perlindungan dan pelestarian agar keberadaan dan perkembangannya dapat berlangsung secara alami.

### 44. Changes in Stock of Land Cover

*The changes in stock of land cover might be caused by several factors, including managed expansion, natural expansion, managed regression, natural regression, and reappraisal.*

- *The managed expansion represents an increase in the area of a land cover type due to human activity.*
- *Natural expansion is an increase in the area resulting from natural processes, including seeding, sprouting, suckering or layering.*
- *Managed regression represents a decrease in the area of a land cover type due to human activity.*
- *Natural regression should be recorded when the area of land cover type reduces for natural reasons.*
- *Reappraisals can be upward or downward and can reflect changes due to the use of updated information that permits a reassessment of the size of the area of different land covers, for example: From new satellite imagery or interpretation of satellite imagery.*

### 45. Conservation Forest

*Conservation Forest is a forest area with specific characteristic to conserve animal and plant species as well as ecosystem. Conservation Forest divided into Sanctuary Reserve, Nature Conservation Area, and Hunting Park.*

### 46. Sanctuary Reserve Area

*A Sanctuary Reserve Area is a specific terrestrial or aquatic area with specific criteria for preserving biodiversity plant and animal as well as ecosystem, which also serves as a live support system. Sanctuary Reserve area consists of Strict Nature Reserve and Wildlife Sanctuary.*

### 47. Strict Nature Reserve

*Strict Nature Reserve is Sanctuary Reserve which due to its natural condition has the uniqueness of plant species and / or plant diversity along with natural phenomena and their ecosystems that require protection and preservation efforts so that their existence and development can take place naturally.*

48. **Suaka Margasatwa**

Suaka Margasatwa adalah Kawasan Suaka Alam yang mempunyai kekhasan/keunikan jenis satwa liar dan/atau keanekaragaman satwa liar yang untuk kelangsungan hidupnya memerlukan upaya perlindungan dan pembinaan terhadap populasi dan habitatnya.

49. **Kawasan Pelestarian Alam**

Kawasan Pelestarian Alam (KPA) adalah kawasan dengan ciri khas tertentu, baik di darat maupun di perairan, yang mempunyai fungsi pokok perlindungan sistem penyangga kehidupan, pengawetan keanekaragaman jenis tumbuhan dan satwa, serta pemanfaatan secara lestari sumber daya alam hayati dan ekosistemnya. Kawasan pelestarian alam berupa Taman Nasional (TN), Taman Hutan Raya (THR), dan Taman Wisata Alam (TWA).

50. **Taman Nasional**

Taman Nasional adalah Kawasan Pelestarian Alam yang mempunyai ekosistem asli, dikelola dengan sistem zonasi yang dimanfaatkan untuk tujuan penelitian, ilmu pengetahuan, pendidikan, menunjang budidaya, pariwisata, dan rekreasi.

51. **Taman Hutan Raya**

Taman Hutan Raya (THR) adalah Kawasan Pelestarian Alam untuk tujuan koleksi tumbuhan dan/atau satwa yang alami atau bukan alami, jenis asli dan/atau bukan jenis asli, yang tidak invasif dan dimanfaatkan untuk kepentingan penelitian, ilmu pengetahuan, pendidikan, menunjang budidaya, budaya, pariwisata, dan rekreasi.

52. **Taman Wisata Alam**

Taman Wisata Alam adalah Kawasan Pelestarian Alam yang dimanfaatkan terutama untuk kepentingan pariwisata alam dan rekreasi.

53. **Kebakaran Hutan dan Lahan**

Kebakaran hutan dan lahan adalah suatu keadaan dimana hutan dan lahan dilanda api, sehingga mengakibatkan kerusakan hutan dan lahan yang menimbulkan kerugian ekonomis dan atau nilai lingkungan. Kebakaran hutan dan lahan seringkali menyebabkan bencana asap yang dapat mengganggu aktivitas dan kesehatan masyarakat sekitar.

54. **PM<sub>10</sub>**

Partikulat (PM<sub>10</sub>) adalah partikel udara yang berukuran lebih kecil dari 10 mikron (mikrometer).

48. **Wildlife Sanctuary**

*Wildlife Reserve is Sanctuary Reserve which has a unique / unique type of wildlife and / or diversity of wild animals which for their survival requires protection and fostering efforts towards their population and habitat.*

49. **Nature Conservation Area**

*A Nature Conservation Area is a specific terrestrial or aquatic area with a main function is to serve life support system and preserve diversity of plant and animal species, as well as to provide a sustainable utilization of living resources and their ecosystems. Nature conservation area consists of National Park, Grand Forest Park, and Nature Recreation Park.*

50. **National Park**

*National Park is a Nature Conservation Area that has an original ecosystem, managed with a zoning system that is utilized for research, science, education, supporting cultivation, tourism and recreation.*

51. **Grand Forest Park**

*Grand Forest Park is Nature Conservation Area for the purpose of natural or non-natural collection of plants and / or animals, native species and / or non-native species, which are non-invasive and used for research, science, education, supporting cultivation, culture, tourism and recreation.*

52. **Nature Recreation Park**

*Nature Recreation Park is a Nature Conservation Area that is used primarily for the benefit of nature tourism and recreation.*

53. **Forest and Land Fires**

*Forest and land fires are a situation in which forests and land are hit by fire, resulting in damage to forests and land which results in economic losses and/or environmental values. Forest and land fires often cause smoke disasters that can disrupt the activities and health of surrounding communities.*

54. **PM<sub>10</sub>**

*Particulates (PM<sub>10</sub>) are air particles smaller than 10 microns (micrometers).*

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

55. **SO<sub>2</sub>**  
SO<sub>2</sub> atau Sulfur Dioksida adalah gas berbau yang menyebabkan iritasi pernapasan terjadi akibat pembakaran batubara, bahan bakar minyak, dan bahan bakar fosil lainnya yang mengandung sulfur. Bisa juga berasal dari proses alami dari gunung berapi.
56. **NO<sub>2</sub>**  
NO<sub>2</sub> atau Nitrogen Dioksida adalah gas yang menyebabkan gangguan pernapasan dalam kadar tinggi, terjadi akibat pembakaran pada kendaraan bermotor dan juga mesin-mesin industri.
57. **Partikel Terlarut**  
Partikel terlarut di udara adalah total konsentrasi partikel di udara yang memiliki diameter <50-100 µm.
58. **Pengukuran Partikel Terlarut**  
Metode pengukuran partikel terlarut di udara yang digunakan adalah Gravimetri.
59. **Waktu Pengukuran Partikel Terlarut**  
Waktu pengukuran partikel terlarut di udara yang adalah setiap enam hari sekali selama 24 Jam di seluruh Indonesia.
60. **Nilai Baku Mutu Partikel Terlarut**  
Nilai baku mutu partikel terlarut di udara adalah 230 µg/m<sup>3</sup>.
61. **Klasifikasi Mutu Air**  
Berdasarkan Peraturan Pemerintah Nomor 82 Tahun 2001 tentang Pengolahan Kualitas Air dan Pengendalian Pencemaran Air, klasifikasi mutu air ditetapkan menjadi empat kelas, yaitu: Kelas I, Kelas II, Kelas III, dan Kelas IV.
62. **Kelas I**  
Kelas I, air yang dapat digunakan untuk air bahan baku air minum dan atau peruntukan lain yang mensyaratkan mutu air yang sama dengan kegunaan tersebut.
63. **Kelas II**  
Kelas II, air yang dapat digunakan untuk prasarana atau sarana rekreasi air, pembudidayaan ikan air tawar, peternakan, air untuk mengairi pertanian, dan atau peruntukan lain yang mensyaratkan mutu air yang sama dengan kegunaan tersebut.
55. **SO<sub>2</sub>**  
*SO<sub>2</sub> or Sulfur Dioxide is gas smell causing exhalation irritation happened effect of coal combustion, oil fuel and other fossil fuel considering sulphur. It can also come from natural process of volcanic mountain.*
56. **NO<sub>2</sub>**  
*NO<sub>2</sub> or Nitrogen Dioxide is gas causing exhalation trouble in high rate, happened effect of combustion at motor vehicle as well as industrial machines.*
57. **Suspended Particulate**  
*Suspended particulate in the air (Total Suspended Particulate/TSP) is the total concentration of particles in the air that has a diameter of <50-100 µm.*
58. **Suspended Particulate Measurement**  
*The method of measuring suspended particulate in the air used is Gravimetric analysis.*
59. **Time for Suspended Particulate Measurement**  
*Time for measuring suspended particulate in the air is every six days for 24 hours throughout Indonesia.*
60. **Quality Standard Value for Suspended Particulate**  
*Quality standards value of suspended particulate in the Air is 230 µg/m<sup>3</sup>.*
61. **Water Quality Classification**  
*According to Government Regulation Number 82 of 2001 on Water Quality Management and Water Pollution Control states that water quality is classified into four categories: Class I, Class II, Class III, and Class IV.*
62. **Class I**  
*Class I, water that can be used for drinking and other uses requiring the same water quality category.*
63. **Class II**  
*Class II, water that can be used for water recreation infrastructure, freshwater fish cultivation, animal husbandry, crop watering, and other uses requiring the same water quality category.*

64. **Kelas III**  
Kelas III, air yang dapat digunakan untuk pembudidayaan ikan air tawar, peternakan, air untuk mengairi pertanaman, dan atau peruntukan lain yang mensyaratkan mutu air yang sama dengan kegunaan tersebut.
65. **Kelas IV**  
Kelas IV, air yang dapat digunakan untuk pertanaman dan atau peruntukan lain yang mensyaratkan mutu air yang sama dengan kegunaan tersebut.
66. **Status Mutu Air Sungai**  
Penentuan status mutu air sungai dilakukan dengan Metode STORET.
67. **Metode STORET**  
Status mutu air dihitung berdasarkan Keputusan Menteri Lingkungan Hidup Nomor 115 tahun 2003 dengan membandingkan antara data kualitas air dan baku mutu air yang disesuaikan peruntukannya guna menentukan status mutu air. Penentuan status mutu air menggunakan sistem nilai dari US-EPA (Environmental Protection Agency), dengan mengklasifikasikan mutu air dalam empat kelas, yaitu :
  - Kelas A : baik sekali, skor = 0 (memenuhi baku mutu)
  - Kelas B : baik, skor = -1 s/d -10 (cemar ringan)
  - Kelas C : sedang, skor = -11 s/d -30 (cemar sedang)
  - Kelas D : buruk, skor  $\geq$  -31 (cemar berat)
68. **Lingkungan Hidup**  
Lingkungan hidup adalah kesatuan ruang dengan semua benda, daya, keadaan, dan makhluk hidup termasuk manusia dan perilakunya yang mempengaruhi alam itu sendiri, kelangsungan perikehidupan, dan kesejahteraan manusia serta makhluk hidup lain.
69. **Pencemaran Lingkungan Hidup**  
Pencemaran lingkungan hidup adalah masuk atau dimasukkannya makhluk hidup, zat, energi, dan/atau komponen lain ke dalam lingkungan hidup oleh kegiatan manusia sehingga melampaui baku mutu lingkungan hidup yang telah ditetapkan.
70. **Indeks Kualitas Tutupan Lahan**  
Indeks Kualitas Tutupan Lahan (IKTL) adalah nilai yang menggambarkan kualitas tutupan lahan yang dihitung dari kondisi tutupan hutan dan tutupan vegetasi non hutan.
64. **Class III**  
*Class III, water that can be used for freshwater fish cultivation, animal husbandry, crop watering, and other uses requiring the same water quality category.*
65. **Class IV**  
*Class IV, water that can be used for watering the crops and other uses that require the same water quality category.*
66. **River Water Quality**  
*River water quality is determined by using STORET method.*
67. **STORET Method**  
*Status of water quality is assessed based on the Decree of Minister of Environment Number 115 Year 2003 by comparing the water quality data and water quality standards that have been adjusted accordingly to determine water quality status. Determination of water quality status uses a value system from the US-EPA (Environmental Protection Agency), by classifying water quality into four classes, namely :*
  - Class A : very good, score = 0 (meets quality standards)
  - Class B : good, score = -1 to -10 (mild smear)
  - Class C : moderate, score = -11 to -30 (medium polluted)
  - Class D : poor, score  $\geq$  -31 (heavily polluted)
68. **Environment**  
*Environment is space unity with all things, energy, condition, and creature including human and their behavior that influences the human-being sustainability and other creature's welfare.*
69. **Environmental Pollution**  
*Environmental pollution is the creatures, substance, energy and/or other components coming or being put into the environment by human's activities so it is more than determined environmental quality standard.*
70. **Land Cover Quality Index**  
*Land Cover Quality Index is a value that describes the land cover quality which is calculated from the condition of forest cover and non-forest vegetation cover.*

## KOMPONEN 1 KONDISI DAN KUALITAS LINGKUNGAN

71. **Indeks Kualitas Ekosistem Gambut**  
Indeks Kualitas Ekosistem Gambut (IKEG) adalah nilai yang menggambarkan kualitas ekosistem gambut yang merupakan nilai komposit dari beberapa parameter kualitas ekosistem gambut dalam suatu wilayah pada waktu tertentu.
72. **Indeks Kualitas Lahan**  
Indeks Kualitas Lahan (IKL) adalah nilai yang menggambarkan kualitas lahan yang terdiri dari Indeks Kualitas Tutupan Lahan dan Indeks Kualitas Ekosistem Gambut.
73. **Indeks Kualitas Udara**  
Indeks Kualitas Udara (IKU) adalah ukuran yang menggambarkan kualitas udara yang merupakan nilai komposit parameter kualitas udara dalam suatu wilayah pada waktu tertentu.
74. **Indeks Kualitas Air**  
Indeks Kualitas Air (IKA) adalah suatu nilai yang menggambarkan kondisi kualitas air yang merupakan nilai komposit parameter kualitas air dalam suatu wilayah pada waktu tertentu.
75. **Indeks Kualitas Air Laut**  
Indeks Kualitas Air Laut (IKAL) adalah suatu nilai yang menggambarkan kondisi kualitas air laut yang merupakan nilai komposit dari beberapa parameter kualitas air laut dalam suatu wilayah pada waktu tertentu.
76. **Indeks Kualitas Lingkungan Hidup**  
Indeks Kualitas Lingkungan Hidup (IKLH) adalah nilai yang menggambarkan kualitas Lingkungan Hidup dalam suatu wilayah pada waktu tertentu, yang merupakan nilai komposit dari Indeks Kualitas Air, Indeks Kualitas Udara, Indeks Kualitas Lahan, dan Indeks Kualitas Air Laut.
71. **Peat Ecosystem Quality Index**  
*Peat Ecosystem Quality Index is a value that describes the peat ecosystem quality which is a composite value of several peat ecosystem quality parameters in an area at a certain time.*
72. **Land Quality Index**  
*Land Quality Index is a value that describes land quality consisting of the Land Cover Quality Index and the Peat Ecosystem Quality Index.*
73. **Air Quality Index**  
*Air Quality Index is a measure that describes air quality which is a composite value of air quality parameters in an area at a certain time.*
74. **Water Quality Index**  
*Water Quality Index is a value that describes water quality conditions which is a composite value of water quality parameters in an area at a certain time.*
75. **Sea Water Quality Index**  
*Sea Water Quality Index is a value that describes the condition of sea water quality which is a composite value of several sea water quality parameters in an area at a certain time.*
76. **Environmental Quality Index**  
*Environmental Quality Index is a value that describes the environment quality in an area at a certain time, which is a composite value of the Water Quality Index, Air Quality Index, Land Quality Index and Sea Water Quality Index.*

### PENJELASAN TEKNIS

- Pertambangan**  
Pertambangan adalah suatu kegiatan pengambilan endapan bahan galian berharga dan bernilai ekonomis dari dalam kulit bumi, di bawah permukaan bumi, dan di bawah permukaan air.
- Bahan Tambang**  
Bahan tambang adalah hasil produksi dari kegiatan pertambangan yang merupakan sumber daya alam yang tidak dapat diperbarui.
- Minyak Bumi**  
Minyak bumi adalah campuran hidrokarbon dalam bentuk cair diperoleh dari lapisan kulit bumi.
- Gas Alam**  
Gas alam adalah semua jenis gas hidrokarbon yang dihasilkan dari sumur penambangan yang terdiri dari komponen utama berupa metana, etana, propana, butana, pentana, dan hexana, ditambang dari dalam bumi, baik diperoleh langsung atau bersamaan dengan *crude oil*.
- Bijih Timah**  
Bijih timah adalah mineral bahan dasar logam timah. Pengolahan bijih timah menjadi logam timah terdiri dari tahap konsentrasi, tahap smelting, dan tahap refining.
- Batu Bara**  
Batu bara adalah salah satu bahan bakar fosil yang terbentuk dari endapan organik, utamanya adalah sisa-sisa tumbuhan.
- Bauksit**  
Bauksit adalah biji utama pembentuk aluminium, bauksit terdiri dari campuran antara aluminium hidroksida dan aluminium oksida.
- Bijih Nikel**  
Bijih nikel adalah mineral atau agregat mineral yang mengandung nikel. Pengolahan bijih nikel menjadi nikel terdiri dari beberapa tahap, yaitu crushing, pengeringan, pereduksian, peleburan, pemurnian, dan granulasi dan pengemasan.
- Emas**  
Emas adalah logam yang bersifat lunak dan mudah ditempa, kekerasannya berkisar antara 2,5 - 3 (Skala Mohs), serta berat jenisnya tergantung pada jenis dan kandungan logam lain yang berpadu dengannya. Emas dapat melebur dalam bentuk cair pada suhu sekitar 1.000 derajat celsius.

### TECHNICAL NOTES

- Mining**  
*Mining is an activity of taking valued quarried material from within the earth layer, under earth surface, and under water level.*
- Mine Material**  
*Mine material is a natural resource as the production of mining operations that can not be renewed.*
- Crude Oil**  
*Crude oil is a mixture of hydrocarbon accuring in liquid phase in subsurface reservoir and remained liquid under atmospheric pressure.*
- Natural Gas**  
*Natural gas is all kinds of hydrocarbon gas produced from wells, mixture of hydrocarbons gas and vapour occuring naturally, which main components are methane, ethane, propane, butane, pentane and hexane, mined from underground occumulation either directly or as associated gas in oil mining.*
- Tin Ore**  
*Tin ore is mineral as the base material of tin. Processing tin ore into tin consists of a concentration, smelting, and refining stages.*
- Coal**  
*Coal is fossil fuels that formed from organic sediment, primarily plant debris.*
- Bauxite**  
*Bauxite is main ore that forming aluminum, bauxite consists of a mixture of aluminum hydroxide and aluminum oxide.*
- Nickel Ore**  
*Nickel ore is a mineral that containing nickel Processing nickel ore into nickel consists of several stages of crushing, drying, reduction, smelting, purification, and granulation and packaging.*
- Gold**  
*Gold is soft and malleable metal with hardness range between 2,5 - 3 (Mohs), and its density depends on the type and content of other metals which combined with it. Gold can be melted into liquid form at 1,000 degrees celsius.*

10. **Konsentrat Tembaga**

Konsentrat tembaga adalah bijih tembaga yang sudah mengalami proses konsentrasi flotasi.

11. **Bahan Galian**

Bahan galian adalah semua jenis mineral dan batuan kecuali mineral logam dan energi yang digali dan diproses untuk penggunaan akhir industri dan konstruksi.

12. **Neraca Aset Sumber Daya Mineral dan Energi**

Neraca aset sumber daya mineral dan energi menyajikan informasi mengenai stok sumber daya mineral dan energi di Indonesia beserta perubahannya dari waktu ke waktu.

13. **Perubahan pada Stok Sumber Daya Mineral dan Energi**

Perubahan pada stok sumber daya mineral dan energi dapat disebabkan oleh beberapa faktor, diantaranya penemuan baru, penilaian kembali, ekstraksi, pengurangan karena bencana, reklasifikasi, dan revaluasi.

- Penemuan baru, yaitu penambahan stok yang disebabkan penemuan cadangan baru selama periode pencatatan. Perubahan status dari sumber daya ke cadangan juga dikategorikan sebagai penemuan baru.
- Penilaian kembali, merupakan perubahan, baik penambahan ataupun pengurangan, dari stok yang telah diestimasi, atau perubahan jenis kategori deposit, berdasarkan perubahan informasi geologi, teknologi, harga sumber daya atau kombinasi dari faktor-faktor tersebut.
- Ekstraksi, merupakan pengurangan kuantitas stok karena sejumlah mineral dan energi diambil dari lingkungan untuk digunakan dalam kegiatan ekonomi, termasuk kegiatan ekstraksi yang dilakukan secara ilegal, baik oleh residen ataupun nonresiden.
- Pengurangan karena bencana, yaitu pengurangan stok yang disebabkan oleh bencana.
- Rekalsifikasi, merupakan perubahan kuantitas stok yang diakibatkan karena dibukanya atau ditutupnya operasi penambangan terhadap cadangan tersebut oleh pemerintah atau pihak yang berwenang.
- Revaluasi, merupakan perubahan nilai moneter stok yang disebabkan oleh perubahan harga cadangan selama periode waktu penghitungan atau karena perubahan asumsi yang diterapkan dalam pendekatan NPV yang digunakan untuk menilai cadangan mineral dan energi.

10. **Copper Concentrate**

Copper concentrate is copper ore that has passed a process of flotation concentration.

11. **Quarrying Material**

Quarrying materials are all kinds of minerals and rocks except metals and energy minerals extracted and processed to manufacturing and construction industry.

12. **Asset Accounts for Mineral and Energy Resources**

Asset accounts for mineral and energy resources present information on the stock of mineral and energy resources in Indonesia and their changes over time.

13. **Changes in Stock of Mineral and Energy Resources**

The changes in stock of mineral and energy resources might be caused by several factors, including discoveries, reappraisal, extraction, catastrophic losses, reclassifications, and revaluation.

- Discoveries, i.e. addition in stock caused by the discovery of new reserves during an accounting period. The change in status from resource to reserve is also categorized as discoveries.
- Reappraisal, i.e. the changes, which may be upward or downward, in the estimated available stock, or changes in the categorization of specific deposits, based on changes in geological information, technology, resource price or combination of those factors.
- Extraction, is a reduction in the quantity of stock because a number of minerals and energy are taken from the environment in order to be used in economic activities, including extraction activities carried out illegally, both by residents and non-residents.
- Catastrophic losses, i.e. reduction in stock caused by disaster.
- Reclassifications, i.e. the change in stock caused by the opening or closing of a mining operation of the reserve by the government or the authorities.
- Revaluation, i.e. the change in the monetary value of the stock caused by changes in the price of reserves during an accounting period or because of changes in assumptions applied in the NPV approach used in the valuation of mineral and energy resources.

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

### 14. Neraca Arus Energi

Neraca arus energi dalam unit fisik merupakan neraca yang mencatat arus energi dari lingkungan ke dalam ekonomi, arus energi di dalam ekonomi, serta arus energi yang kembali ke lingkungan. Arus energi ini terdiri dari arus energi dari input alam, arus produk energi, dan arus residu energi.

### 15. Energi dari Input Alam

Energi dari input alam mencakup arus energi dari pemindahan dan penangkapan energi dari lingkungan oleh unit ekonomi residen.

### 16. Produk Energi

Produk energi adalah produk yang dapat digunakan sebagai sumber energi, termasuk energi dari biomassa dan limbah padat yang dibakar untuk menghasilkan listrik dan/atau panas.

### 17. Residu Energi

Residu energi dalam unit fisik meliputi energi yang hilang selama ekstraksi, selama transformasi, selama distribusi, maupun residu energi lainnya, khususnya panas yang dihasilkan ketika pengguna akhir menggunakan produk energi untuk tujuan energi.

### 18. Neraca Energi

Neraca energi disajikan dalam bentuk matriks. Lajur baris menunjukkan aliran dari asal energi sampai ke penggunaannya (transaksi energi), misal produksi, ekspor, impor, stok kebutuhan energi, energi konversi. Lajur kolom menunjukkan sumber energi (komoditi energi), misal batubara, minyak mentah, BBM, gas alam, tenaga panas bumi dan listrik.

### 19. Konversi Data Energi

Konversi data dari satuan berat atau volume ke satuan energi terajoule yang baku diperoleh dengan menggunakan Standar Faktor Konversi dari Publikasi PBB dan Nilai Kalor Standar dari Publikasi *International Recommendation on Energy Statistics (IRES)*.

### 20. Produksi Energi Primer

Produksi energi primer didasarkan pada jumlah energi yang diekstraksi, selanjutnya didefinisikan sebagai penangkapan atau ekstraksi bahan bakar atau energi dari aliran energi alam, biosfer dan cadangan alami. Hasil produk ini disebut produk primer. Energi primer seperti minyak mentah termasuk juga yang digunakan untuk proses dan yang dipasok ke penghasil energi yang lain.

### 14. Energy Flow Accounts

*Energy flow accounts in physical term record the flows of energy from the environment into the economy, the flows of energy within the economy, and the flows of energy back to the environment. Energy flows consists of flows of energy from natural inputs, flows of energy products, and flows of energy residuals.*

### 15. Energy from Natural Inputs

*Energy from natural inputs encompasses flows of energy from the removal and capture of energy from the environment by resident economic unit.*

### 16. Energy Product

*Energy products are products that are used (or might be used) as a source of energy, including energy from biomass and solid waste that are combusted for the production of electricity and/or heat.*

### 17. Energy Residuals

*Energy residuals in physical terms comprise energy losses during extraction, during transformation, during distribution, as well as other energy residuals, particularly heat generated when end-users use energy products for energy purposes.*

### 18. Energy Balance

*Energy balance is presented in the matrix form. Rows show flows from origins to uses of energy (energy transactions), e.g. production, export, import, stock, energy conversion. Columns show energy sources (energy commodities), e.g. coal, crude oil, petroleum product, natural gas, LPG, NGL, derived gases and electricity.*

### 19. Energy Data Conversion

*The Conversion of energy data from various units to terajoule is obtained from the Standard Conversion Factors of United Nations Publication and Default Calorific Value from IRES Publication.*

### 20. Production of Primary Energy

*The production of primary energy refers to the quantities of energy extracted which in turn is defined as the capture or extraction of fuels or energy from natural energy flows, the biosphere and natural reserves. The resulting products are referred to as primary products. In general, it includes the quantities of crude petroleum consumed in this process as well as supplies to*

Produksi energi primer mencakup produksi batubara tua, batubara muda dan lignit, produksi minyak mentah, produksi gas alam, energi biomassa, dan produksi tenaga listrik bruto.

*other producers of energy for transformation or other uses. The production of primary energy includes production of hard coal, lignite and brown coal, crude oil production, natural gas production, biomass energy, and gross production of electricity.*

**21. Produksi Batubara dan Lignit**

Produksi batubara tua, batubara muda dan lignit mencakup yang dijual, dikonsumsi oleh penambang, diberikan ke penambang, dan yang diolah menjadi briket dan lainnya. Jumlah batubara yang diekstraksi dikurangi dengan yang tidak dapat digunakan setelah penyaringan dan pencucian.

**21. Production of Coal and Lignite**

*Production of hard coal, lignite and brown coal comprises the sum of sales, and consumption by mines, issues to mines, issues to coking, briquetting and other ancillary plants at mines and changes in pithead stocks. The amounts of hard coal extracted are reduced by the amount of non utilizable waste left after screening and washing.*

**22. Produksi Minyak Mentah**

Produksi minyak mentah mencakup produksi dari pengeboran di laut dan pengeboran di daratan, termasuk didalamnya minyak serpih dan kondensat.

**22. Crude Oil Production**

*Crude oil production includes production from onshore and offshore referred to oil shale and condensate.*

**23. Produksi Gas Alam**

Produksi gas alam adalah yang dihasilkan langsung dari lapangan gas, tidak mencakup banyaknya gas yang diinjeksikan dan di bakar sama halnya seperti penyusutan gas, karena dikonversi menjadi cairan gas alam.

**23. Natural Gas Production**

*Natural gas production include production from fields, does not include the amount of gas injected and in the fuel gas as well as depreciation, because the conversion to natural gas liquids.*

**24. Energi Biomassa**

Energi biomassa mencakup produksi biomassa primer dan turunan, seperti kayu bakar dan arang.

**24. Biomass Energy**

*Primary biomass energy includes fuel wood and charcoal.*

**25. Produksi Tenaga Listrik Bruto**

Produksi tenaga listrik bruto yang dihasilkan oleh pembangkit tenaga air dan panas bumi dikelompokkan dalam jenis sumber energi lainnya.

**25. Gross Production of Electricity**

*Gross production of electricity generated by hydroelectric and geothermal energy sources are presented in other types.*

**26. Impor Produk Energi**

Impor produk energi terdiri dari semua bahan bakar dan produk energi lainnya yang masuk ke wilayah suatu negara. Barang-barang yang diangkut melewati suatu negara dan barang-barang yang sementara diakui dipisahkan dan di impor kembali, yang merupakan barang domestik yang diekspor tetapi kemudian diterima kembali dimasukkan. *Bunker* bahan bakar di luar wilayah referensi oleh kapal dagang nasional dan pesawat sipil yang terlibat dalam perjalanan internasional dipisahkan dari impor.

**26. Import of Energy Product**

*Imports of energy products comprise all fuel and other energy products entering the national territory. Goods simply being transported through a country (goods in transit) and goods temporarily admitted are excluded but re-imports, which are domestic goods exported but subsequently readmitted, are included. The bunkering of fuel outside the reference territory by national merchant ships and civil aircraft engaged in international travel is excluded from imports.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

### 27. Ekspor Produk Energi

- Ekspor produk energi terdiri dari seluruh bahan bakar dan produk energi lainnya yang keluar dari wilayah suatu negara tidak termasuk bahan bakar atau energi yang digunakan untuk mengirim. Impor dan ekspor minyak mentah termasuk didalamnya *feedstock* dan hasil pengilangan dari minyak mentah. Barang yang hanya diangkut melalui suatu negara (barang dalam perjalanan) dan barang yang ditarik sementara dikeluarkan tetapi diekspor kembali, barang-barang asing yang diekspor dalam keadaan yang sama seperti yang sebelumnya diimpor, dimasukkan.
- Untuk listrik, pertukaran data termasuk "barang dalam transit", listrik ditransmisikan melalui negara dari satu negara ke negara lainnya, karena tidak ada cara praktis untuk mengetahui jumlah yang diekspor kembali dan yang dikonsumsi oleh negara transit. Pada format neraca energi, impor ditandai angka positif, sedangkan ekspor ditandai dengan negatif.

### 28. Marine/Aviation Bunker

*Marine* atau *aviation bunker* adalah bahan bakar yang digunakan oleh kapal laut maupun pesawat udara dari seluruh negara yang mengisi bahan bakar untuk keperluan lalu lintas Internasional. Lalu lintas internasional terjadi ketika lokasi keberangkatan dan lokasi tujuan berbeda wilayah nasional. Penggunaan bahan bakar untuk pelayaran dalam negeri dan pesawat udara untuk penerbangan domestik tidak termasuk disini. *Marine* atau *aviation bunker* tidak termasuk ke dalam ekspor.

### 29. Perubahan Stok

Stok adalah jumlah dari produk energi yang disimpan di suatu wilayah nasional dan dapat digunakan untuk memberikan layanan dan suplai. Perubahan Stok merupakan perbedaan antara jumlah bahan bakar sebagai stok awal tahun dan akhir tahun. Tanda negatif menunjukkan kenaikan stok, sementara tanda positif menunjukkan penurunan stok.

### 30. Total Persediaan Energi Primer

Total persediaan energi primer merupakan persediaan energi didalam negeri yang digunakan untuk konsumsi akhir ataupun dikonversikan menjadi bentuk energi lain.

### 27. Export of Energy Product

- Exports of energy products comprise all fuel and other energy products leaving the national territory with the exception that exports exclude quantities of fuels delivered for use by merchant (including passenger) ships and civil aircraft, of all nationalities, during international transport of goods and passengers. Goods simply being transported through a country (goods in transit) and goods temporarily withdrawn are excluded but re-exports, foreign goods exported in the same state as previously imported, are included.
- For electricity, trade data include "goods in transit", i.e. electricity transmitted through the country from one neighbour to another, as there is no practical way of discerning which quantities are re-exported and which are consumed by the transit country. In the energy balance format, imports are positive numbers, while exports are negative numbers and carry a negative sign (-).

### 28. Marine/Aviation Bunker

*Marine* or *aviation bunker* is the amounts of fuel delivered to ocean going ship or aircraft of all flags engaged in International traffic. International traffic take place when the ports of departure and arrival are in the different national territories. Deliveries to ships engaged in transport in inland and coastal waters and aircraft engaged in domestic flights, are not included. *Marine* or *aviation bunkers* are not included in exports.

### 29. Stock Change

*Stocks* are quantities of energy products that are held on the national territory and can be used to maintain service and supply. *Stocks changes* are the difference between the amounts of fuels in stocks at the beginning and end of the year. A negative sign indicates net increases while a positive sign indicates net decreases a stock.

### 30. Production of Primary Energy

Total primary energy supply refer to the inland availability of primary energy for final consumption or converted into other energy forms.

31. **Transformasi**

- Transformasi merupakan proses yang mengkonversi suatu produk energi menjadi produk energi lain yang lebih berguna. Hal ini terjadi ketika bagian dari semua konten energi suatu produk memasuki proses bergerak dari produk satu ke produk yang berbeda (contoh batu bara menjadi kokas, minyak mentah menjadi produk minyak, dan minyak bahan bakar menjadi listrik. Transformasi memperlihatkan jumlah input produk yang digunakan dalam konversi (tanda negatif), dan output dari energi sekunder (tanda positif).
- Transformasi mencakup pabrik briket, oven kokas, kilang gas, tungku tinggi, kilang minyak, dan pembangkit listrik.

32. **Pabrik Briket**

Pabrik Briket meliputi pabrik bahan bakar paten, pabrik briket batubara coklat, pabrik briket gambut. Pabrik bahan bakar paten adalah pabrik yang menghasilkan bahan bakar paten. Pabrik briket batubara coklat menghasilkan briket batubara coklat (BKB). Pabrik briket gambut menghasilkan briket gambut (termasuk pabrik yang memproduksi seluruh produk gambut dari gambut primer).

33. **Oven Kokas**

Oven kokas adalah tungku besar dimana kokas, gas dan tar batubara dihasilkan oleh karboniasi dari batubara dengan suhu tinggi.

34. **Kilang Gas**

Kilang gas terdiri dari pabrik gas ke cair dan Pabrik NGL dan pencampuran gas. Pada pabrik gas ke cairan (*gas to liquid* (GTL)), gas alami digunakan sebagai bahan baku dalam menghasilkan bahan bakar cair. Bahan bakar cair biasanya digunakan untuk bahan bakar kendaraan. Pabrik NGL dan pencampuran gas terdiri dari pabrik pemisahan gas alam cair (NGL) dan pabrik pencampuran gas alam. Pabrik pemisahan gas alam cair adalah pabrik yang terlibat dalam pemisahan dari air, kotoran, dan gas alam cair dari gas alam. Sebagai tambahan, aktivitas dari pabrik ini juga melibatkan fraksinasi cairan gas alam yang dipulihkan. Pabrik pencampuran gas alam merupakan pabrik, terpisah dari gas bekerja, dimana gas alam pengganti, gas petroleum atau biogas dicampurkan dengan gas alam untuk distribusi pada gas induk. Pencampuran dari gas alam pengganti dengan gas alam dianggap sebagai proses gas bekerja.

31. **Transformation**

- Transformation is processes that convert an energy product into another energy product which, in general, is more suitable for specific uses. It occurs when part or all of the energy content of a product entering a process moves from this product to one or more different products leaving the process (e.g., coking coal to coke, crude oil to oil products, and fuel oil to electricity). Transformation shows the net input of any given product for the purpose of converting it to one or more products (negative sign) and the output of these secondary products (positive sign).
- Transformation includes briquetting plants, coke ovens, gas refineries, blast furnaces, oil refineries, and electricity plants.

32. **Briquetting Plants**

Briquetting plants comprise Patent fuel plants, Brown coal briquette plants and Peat briquette plants. Patent fuel plants are plants manufacturing patent fuels, Brown coal briquette plants are plants manufacturing brown coal briquettes (BKB). Peat briquette plants are plants manufacturing peat briquettes (included here are plants producing all kinds of peat products from primary peat).

33. **Coke Oven**

Coke ovens are large ovens within which coke oven coke, coke oven gas and coal tars are produced by high temperature carbonisation of coking coal.

34. **Gas Refineries**

Gas refineries comprise Gas to liquid (GTL) plants and NGL plants and gas blending. Gas-to-liquid (GTL) plants are plants in which natural gas is used as a feedstock for the production of liquid fuels. The liquid fuels are usually used as vehicle fuels. NGL plants and gas blending comprise Natural gas liquids (NGL) separation plants and Natural gas blending plants. Natural gas liquids (NGL) separation plants are plants involved in the separation of water, impurities and natural gas liquids from natural gas. In addition, the activities of these plants may also involve fractionation of the recovered natural gas liquids. Natural gas blending plants are plants, separate from gas works, in which substitute natural gas (see gas works gas), petroleum gases or biogases are mixed with natural gas for distribution in the gas mains. Where blending of substitute natural gas with natural gas takes place within gas works the blending is considered part of the gas works process.

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

35. **Tungku Tinggi**  
Tungku tinggi adalah tungku yang menghasilkan gas tungku tinggi sebagai produk sampingan saat membuat besi kasar dari bijih besi. Selama proses, karbon dalam bentuk batubara, ditambahkan ke tungku tinggi untuk mendukung dan mengurangi oksidasi besi dan menyediakan panas.
36. **Kilang Minyak**  
Kilang minyak adalah pabrik yang mengubah minyak mentah dan hidrokarbon (bersamaan dengan aditif, bahan baku, dan cairan gas alam) menjadi produk minyak jadi. Produk jadi biasanya merupakan gas-gas petroleum cair, nafta, bensin motor, minyak gas, bahan bakar aviasi, kerosene lain dan bahan bakar minyak.
37. **Pembangkit Listrik**  
Pembangkit listrik hanya memproduksi listrik. Listrik mungkin diperoleh secara langsung dari alam seperti, air, panas bumi, angin, air pasang, laut, energi matahari atau dari bahan bakar fosil atau dari panas diperoleh dari pembakaran bahan bakar atau reaksi nuklir. Untuk mempermudah format yang seimbang, pembangkit listrik mencakup CHP dan pembangkit kalor.
38. **Transfer**  
Transfer meliputi gerakan bahan energi antara tempat proses pada sektor yang berlainan, sebagai contoh adalah dalam proses pencampuran gas alam dalam arus produksi gas, atau pengalihan produk (*feedstock*) untuk proses lanjutan dalam industri pengilangan atau transfer produk sebagai campuran.
39. **Konsumsi Sektor Energi**  
Konsumsi sektor energi meliputi konsumsi energi oleh produsen dan transformasi energi untuk operasi instalasinya. Termasuk di dalamnya konsumsi untuk kompresor dan stasiun pompa.
40. **Hilang dalam Konversi, Transportasi dan Distribusi**  
Hilang dalam konversi, transportasi dan distribusi meliputi hilangnya energi listrik, gas alam dan gas turunannya karena dari peralatan atau pabrik atau mesin. Untuk kerugian konversi profil listrik, transmisi dan distribusi tidak menampilkan secara eksplisit tetapi terdiri dari perbedaan antara konsumsi di sektor transportasi, industri, konstruksi, rumah tangga dan konsumen lainnya.
35. **Blast Furnaces**  
*Blast furnaces are furnaces which produce blast furnace gas as a by product when making pig iron from iron ore. During the process, carbon, mainly in the form of coke, is added to the blast furnace to support and reduce the iron oxide charge and provide heat.*
36. **Oil Refineries**  
*Oil refineries are plants which transform crude oil and other hydrocarbons (together with additives, feedstocks and natural gas liquids) into finished oil products. Typical finished products are liquefied petroleum gases, naphtha, motor gasoline, gas oils, aviation fuels and other kerosene, and fuel oils.*
37. **Electricity Plants**  
*Electricity plants refer to plants producing only electricity. The electricity may be obtained directly from natural sources such as hydro, geothermal, wind, tidal, marine, solar energy or from fuel cells, or from the heat obtained from the combustion of fuels or nuclear reactions. For the simplified balance format, Electricity plants include CHP and Heat plants.*
38. **Transfers**  
*Transfers comprise the movement of energy commodities between processes in different sectors for example the blending of natural gas in the manufactured gas stream or the diversion of products (feedstock) for further processing in the refining industry or the transfer of products for blending.*
39. **Consumption by Energy Sector**  
*Consumption by energy sector comprises the energy consumption by producers and transformers of energy for operating their installations. It includes the consumption of compressor and pumping stations of pipelines.*
40. **Losses in Conversion, Transport and Distribution**  
*Losses in conversion, transport and distribution refers to the losses of electrical energy, natural gas and derived gasses which occur outside the utilities or plants. For the electricity profiles losses in conversion, transmission and distribution are not explicitly shown but comprise the difference between the consumption of the transportation sector, industry, construction households and other consumers.*

## 41. **Penggunaan Energi Industri Sendiri**

Penggunaan energi industri sendiri adalah konsumsi bahan bakar dan energi untuk produksi dan persiapan penggunaan energi. Jumlah bahan bakar yang diubah menjadi bahan bakar atau energi lain tidak termasuk disini tetapi masuk kedalam transformasi. Juga tidak termasuk bahan bakar yang digunakan untuk transportasi. Kuantitas ini dilaporkan pada konsumsi akhir.

## 42. **Konsumsi Bukan untuk Energi/Bahan Baku**

Konsumsi bukan untuk energi/bahan baku merupakan transfer produk untuk industri kimia dan industri lainnya untuk keperluan bukan sebagai energi. Mencakup total bukan untuk energi (misalnya bahan baku untuk tumbuhan protein dan industri petrokimia).

## 43. **Konsumsi Akhir**

Konsumsi akhir mengacu pada semua bahan bakar dan energi yang diberikan pengguna untuk penggunaan energi dan non energi yang tidak melibatkan proses transformasi. Konsumsi oleh sektor industri pengolahan, konstruksi, transportasi, rumah tangga dan konsumen lain.

## 44. **Konsumsi oleh Sektor Industri, Pertambangan dan Konstruksi**

Konsumsi oleh sektor industri, pertambangan dan konstruksi tidak termasuk yang dipakai oleh sektor energi dan digunakan sebagai input dalam industri konversi energi. Konsumsi pada industri kimia hanya yang digunakan sebagai bahan bakar.

## 45. **Konsumsi oleh Sektor Transportasi**

Konsumsi oleh sektor transportasi termasuk yang dipakai untuk pelayaran dalam negeri dan pesawat udara untuk penerbangan domestik.

## 46. **Konsumsi oleh Sektor Rumah Tangga**

Konsumsi oleh sektor rumah tangga dan konsumen lainnya termasuk pertanian, perdagangan, penerangan umum dan sektor-sektor lain. Konsumen lain termasuk perdagangan, komunikasi, jasa dan aktivitas lain yang belum disebut.

## 47. **Perbedaan Statistik**

Perbedaan statistik pada keseimbangan energi adalah perbedaan numerik antara total persediaan kelompok produk energi yang dijelaskan oleh kolom masing-masing dan total penggunaannya. Cara penghitungannya dengan mengurangi yang terakhir dengan yang awal.

## 41. **Energy Industries Own Use**

*Energy industries own use refers to consumption of fuels and energy for the direct support of the production, and preparation for use of fuels and energy. Quantities of fuels which are transformed into other fuels or energy are not included here but within transformation. Neither are quantities which are used for transportation purposes in the energy industry. These quantities are reported within final consumption.*

## 42. **Consumption for Non Energy Use/Feedstock**

*Consumption for non energy use/feedstock is transfers of products to the chemical and other industries for non energy purposes. It comprises total non energy uses (e.g. feedstock for petrochemical industry).*

## 43. **Final Consumption**

*Final consumption refers to all fuel and energy that is delivered to users for both their energy and nonenergy uses which do not involve a transformation process. The consumption by industry and construction, by the transport industry and household and other consumers.*

## 44. **Consumption by Industry, Mining, and Construction Sector**

*Consumption by industry, mining, and construction excludes consumption by the energy sector and use as input in the energy conversion industry. Consumption in the chemical industry only includes use of fuel.*

## 45. **Consumption by Transportation Sector**

*Consumption by transport sector includes deliveries to ships engaged in transport in inland and coastal waters and aircraft engaged in domestic flights.*

## 46. **Consumption by Household Sector**

*Consumption by household and all other consumers, include agriculture, trade, public lighting and all other sector. Other consumers include trade, communications, services and activities not specified.*

## 47. **Statistical Difference**

*Statistical difference in the energy balance is the numerical difference between the total supply of the group of energy products described by the respective column and the total use of it. It is calculated by subtracting latter from the former. The statistical difference is a discrepancy that*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

Perbedaan statistik adalah perbedaan yang muncul dari berbagai keterbatasan praktis dan masalah yang terkait dengan pengumpulan data yang membentuk penawaran dan permintaan. Data dapat dikenakan sampling atau kesalahan pengumpulan lainnya, dan/atau diambil dari sumber data yang berbeda, spesifikasi bahan bakar yang berbeda, atau konversi yang berbeda dari volume ke massa atau dari massa ke konten energi di sisi keseimbangan penawaran dan permintaan.

*arises from various practical limitations and problems related to the collection of the data which make up supply and demand. The data may be subject to sampling or other collection errors, and/or be taken from different data sources which use different time periods, different spatial coverage, different fuel specifications or different conversions from volume to mass or from mass to energy content in the supply and demand sides of the balance.*

48. **Batubara Keras dan Batubara Muda**

Batubara keras adalah batubara dengan kalori kotor senilai di atas 5.700 kcal/kg tanpa abu dan lembab. Batubara muda adalah batubara dengan kalori kotor 5.700 kcal/kg atau lebih.

48. **Hard Coal and Brown Coal/Lignite**

*Hard coal refers to coal of gross calorific value over 5.700 kcal/kg on an ash-free but moist basis. Brown coal/lignite are coal with 5.700kcal/kg or more gross calories.*

49. **Briket Batubara Muda**

Briket batubara muda adalah bahan bakar komposisi terbuat dari batubara coklat hasil dari proses pembriketan hasil tekanan tinggi dengan atau tanpa tambahan alat ikat. Meskipun batubara *sub-bituminous* atau batubara muda digunakan, termasuk batubara muda kering dan debu.

49. **Brown Coal Briquettes**

*Brown Coal Briquettes (BKB) is a composition fuel made of brown coal produced by briquetting under high pressure with or without the addition of a binding agent. Either sub-bituminous coal or lignite may be used, including dried lignite fines and dust.*

50. **Kokas Batubara**

Bagian ini termasuk padat, seluler, sisa bahan yang dapat dipakai setelah karbonisasi sebagian batubara. Berbagai batubara ditetapkan berdasarkan jenis dari karbonisasi batubara dan kondisi dari karbonisasi atau penggunaan; batubara memanggang batubara, gas batubara, uap batubara dan semi batubara.

50. **Coal Coke**

*This group includes the solid, cellular, infusible material remaining after the carbonisation of certain coals. Various cokes are defined according to the type of coal carbonised and their conditions of carbonisation or use: coke oven coke, gas coke, coke breeze and semi cokes.*

51. **Minyak Mentah dan NGL**

- Minyak mentah meliputi produk cair yang diperoleh dari sumur minyak, sebagian besar berupa hidrokarbon non-aromatik. Termasuk juga sejumlah yang dipakai sendiri pada proses produksi dan juga untuk transformasi energi.
- *Natural Gas Liquids* (NGL) meliputi *natural gasoline*, LPG dari pabrik khusus (untuk membedakan dari pengilangan) dan dari pabrik kondensat dan produksi akhir lainnya. NGL dihasilkan dari campuran etana, propana, butana, pentana, dan beberapa alkana yang lebih tinggi.

51. **Crude Petroleum and NGL**

- *Crude petroleum* comprises the liquid product obtained from oil wells consisting predominantly of non-aromatic hydrocarbons (cyclonic), provided that they have not been subjected to any further processes other than those of decantation dehydration or stabilization.
- *Natural gas liquids* (NGL) comprise *natural gasoline*, liquefied petroleum gases from special plants (as distinct from refineries) and of factor condensate and the final production other. NGL are a mixture of ethane, propane, butane, pentane, and a few higher alkanes.

52. **BBM Berkadar Ringan**

Bahan bakar minyak berkadar ringan terdiri dari *aviation gasoline* (avgas), *motor gasoline* (mogas), *natural gasoline*, *jet fuel*, minyak tanah, *naphtha*, dan *white spirit/industrial spirit*.

52. **Light Petroleum Products**

*Light petroleum products* comprised *aviation gasoline*, *motor gasoline*, *natural gasoline*, *jet fuel*, *kerosene*, *naphtha*, *white spirit/industrial spirit*.

53. **Aviation Gasoline**

*Aviation gasoline (Avgas)* termasuk tingkat campuran khusus dari bensin, dengan stabilitas tinggi, mudah sekali menguap dan mempunyai titik beku yang rendah dan bertujuan digunakan untuk mesin pesawat terbang.

54. **Motor Gasoline**

*Motor gasoline (Mogas)* meliputi campuran hidrokarbon yang mudah menguap dengan atau tanpa sejumlah kecil tambahan, yang telah dicampur membentuk bahan-bahan yang sesuai untuk digunakan pengapian pada pembakaran dalam mesin.

55. **Natural Gasoline**

*Natural gasoline* sering digabungkan dengan minyak mentah. Digunakan pada pengilangan minyak dan pabrik petrokimia dan juga digunakan secara langsung untuk mencampur dengan penggerak tanpa mempercepat proses.

56. **Jet Fuel**

Jet Fuel meliputi bahan bakar yang dibutuhkan untuk pemakaian mesin turbin pesawat, terutama yang dimurnikan dari minyak tanah.

57. **Minyak Tanah**

Minyak tanah adalah campuran hidrokarbon dengan titik nyala 38 derajat celcius. Digunakan untuk menerangi dan sebagai bahan bakar yang dalam beberapa jenis pengapian mesin seperti yang digunakan untuk traktor pertanian dan mesin stasioner.

58. **Naphtha**

*Naphtha* adalah pemurnian yang berasal dari minyak mentah atau gas alam dengan titik didih kira-kira berada diantara 27 dan 221 derajat celcius. Bila dicampur dengan bahan lain akan menjadi motor gasoline atau jet fuel dengan mutu yang lebih tinggi. Juga digunakan sebagai bahan baku untuk gas kota, atau membuat berbagai jenis produk kimia atau digunakan sebagai bahan pelarut, tergantung pada sifat dari turunan naphtha dan permintaan berjenis-jenis industri.

59. **White Spirit/Industrial Spirit**

*White Spirit/Industrial Spirit* adalah hasil kilang dengan titik didih berkisar antara 150 sampai 200 derajat celcius digunakan sebagai pelarut cat dan untuk penggunaan alat pembersih/pengering.

53. **Aviation Gasoline**

*Aviation gasoline includes any of the specially blended grades of gasoline, with high anti-knock value, high stability, a high volatility and low freezing point, intended for use in aviation piston power units only.*

54. **Motor Gasoline**

*Motor gasoline comprises a mixture of relatively volatile hydrocarbons, with or without small quantities of additives, which have been blended to for a fuel suitable for use in sparkignition internal combustion engines.*

55. **Natural Gasoline**

*Natural gasoline refers to a light spirit extracted from wet natural gas, often in association with crude petroleum. It is used as petroleum refinery and petrochemical plant input and is also used directly for blending with motor spirit without further processing.*

56. **Jet Fuel**

*Jet fuel comprises fuel meeting the requires properties for use in jet engines and aircraft turbine engines, mainly refined from kerosene.*

57. **Kerosene**

*Kerosene comprises mixtures of hydrocarbons with a flash point above 38 degrees centigrade. It is used as an illuminant and as a fuel in certain types of spark ignition engines, such as those used for agricultural tractors and stationary engines.*

58. **Naphtha**

*Naphtha refer to refined or partly refined light distillates derived from crude petroleum or natural gas, with a boiling point range roughly between 27 and 221 degrees centigrade, which are to be further blended or mixed with other materials to make high-grade motor gasoline or jet fuel, or to be used as raw materials for town gas or feedstock to make various kinds of chemical products, or to be used as various solvents, depending on the character of naphtha derived and the demands of chemical products.*

59. **White Spirit/Industrial Spirit**

*White spirit/industrial spirit refers to a highly refined distillate with a boiling point range of about 150 to 200 degrees centigrade, used as a paint solvent and for dry-cleaning purposes.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

60. **BBM Berkadar Berat**  
Bahan bakar minyak berkadar berat terdiri dari minyak diesel dan minyak residu.
61. **Minyak Diesel**  
Minyak diesel meliputi minyak gas, minyak bakar domestik. Ini dipakai sebagai bahan bakar untuk pembakaran dalam mesin-mesin diesel, sebagai penyalu bahan bakar dalam instalasi pemanas seperti furnaces (perapian, dapur untuk melebur logam, gelas). Hasil produk ini umumnya disebut minyak bakar, minyak diesel, solar, minyak residu dan minyak gas.
62. **Minyak Residu**  
Minyak residu adalah sisa minyak mentah yang diperoleh dari proses operasi pengilangan minyak mentah setelah gasoline, minyak tanah, minyak diesel dan minyak gas dikeluarkan. Pada umumnya digunakan oleh kapal dan industri besar dengan instalasi pemanas sebagai bahan bakar pada oven dan boiler/ketel.
63. **Hasil Olahan Minyak Lainnya**  
Hasil olahan minyak lainnya terdiri dari minyak pelumas, bahan baku kilang, *plant condensate*, bitumen (*asphalt*), *petroleum waxes*, *petroleum coke*, dan *other petroleum products*.
64. **Minyak Pelumas**  
Minyak pelumas adalah campuran pada penyulingan Hidrokarbon volumenya kurang dari 30% pada 300 derajat celcius dengan titik alir lebih rendah dari 30 derajat centigrade. Merupakan cairan berat yang didapat dari pengilangan minyak mentah dan digunakan untuk pelumasan.
65. **Bahan Baku Kilang**  
Bahan baku kilang adalah produk atau kombinasi produk hasil dari minyak mentah untuk proses lanjutan di dalam industri pengilangan.
66. **Plant Condensate**  
*Plant condensate* adalah cairan hidrokarbon pekat dari proses pabrik gas alam. Digunakan sebagai input pada pengilangan minyak bumi.
67. **Bitumen (Asphalt)**  
Bitumen (*asphalt*) terdiri dari bahan padat atau semi padat coklat kehitaman diproses sebagai sisa dari penyulingan minyak mentah. Digunakan terutama sebagai kontruksi jalan raya. Aspal alam tidak termasuk disini.
60. **Heavy Petroleum Products**  
*Heavy petroleum products comprised diesel oils and residual oil.*
61. **Diesel Oil**  
*Diesel oils comprise gas oils, fuel oils, domestic fuel oils. It is used as a fuel for internal combustion in diesel engines, as a burner fuel in heating installations such as furnaces and for enriching water gas to increase its luminosity. The data refer to those products commonly called diesel fuel, diesel oil, gas oil, solar oil, etc.*
62. **Residual Oil**  
*Residual oil is residual oil that was obtained from the crude oil refining operations after gasoline, kerosene, diesel oil and sometimes heavier distillates. It commonly used by ships and industrial large-scale heating installations as a fuel in furnaces or boilers.*
63. **Other Petroleum Products**  
*Other petroleum products omprised lubricant, refinery feedstock, plant condensate, bitumen (asphalt), petroleum waxes, petroleum coke, and other petroleum products.*
64. **Lubricant**  
*Lubricants are mixtures of hydrocarbons distilling less than 30 percent in volume at 300 degrees centigrade with a flow point lower than 30 degrees centigrade. They are heavy liquid distillates obtained by refining crude petroleum and are used for lubricating purposes.*
65. **Refinery Feedstock**  
*Feedstock refer to the products or a combination of products derived from crude oil destined for further processing in the refining.*
66. **Plant Condensate**  
*Plants condensate comprises a liquid hydrocarbon condensed from wet natural gas in natural gas processing plants. It is used as a petroleum refinery input.*
67. **Bitumen (Asphalt)**  
*Bitumen (asphalt) comprises the brown to black or semi-solid material obtained as a residue in the distillation of crude petroleum. It is used mainly in road construction. Natural asphalt is excluded.*

68. **Petroleum Waxes**

*Petroleum Waxes* termasuk paraffin wax (bahan kristal hidrokarbon yang putih atau kuning terang) diperoleh sebagai sisa pada penyulingan minyak mentah. Paraffin wax dan wax emulsions digunakan untuk penggosok/ semir, penahan air (water proof), container dan bahan pembungkus

69. **Petroleum Coke**

*Petroleum Coke* adalah sisa padat terdiri dari karbon diperoleh dari penyulingan minyak bumi yang lebih berat. Digunakan terutama pada proses metalurgi. Di sini tidak termasuk sisa padat yang didapat dari kombinasi batubara.

70. **Other Petroleum Products**

*Other Petroleum Products* adalah produk dari minyak bumi (termasuk bagian dari produk pengilangan) yang tidak disebutkan diatas.

71. **LPG dan Gas Kilang**

*Liquefied Petroleum Gases (LPG)* meliputi :

- Penyaringan hidrokarbon dengan mengupas gas alam pada sumber minyak mentah/gas alam.
- Penyaringan hidrokarbon dengan memisahkan dari instalasi gas alam impor dinegara importir.
- Produksi hidrokarbon yang berasal dari pengilangan atau diluar pengilangan pada saat pemrosesan minyak mentah. Dimana komponen utamanya adalah propana, butana, isobutana, dan etana.

72. **Gas Alam**

Gas Alam termasuk dua jenis gas alam yang tidak berkaitan (yakni yang berasal dari hasil lapangan, hidrokarbon dalam bentuk gas); gas alam gabungan (yang berasal dari hasil lapangan berupa cairan dan gas hidrokarbon) dan juga ethene yang dikupas dari lapisan atas pada tambang batubara dan gas buangan. Tidak termasuk NGL untuk transportasi.

73. **Produksi Listrik**

- Produksi listrik meliputi produksi kotor yaitu termasuk konsumsi yang dipakai stasiun pembantu dan hilang dalam perjalanan/ *tranformers* dianggap sebagian dari stasiun.

68. **Petroleum Waxes**

*Petroleum waxes* include paraffin wax (a translucent white or yellow crystalline hydrocarbon material of low oil content normally obtained as a residue by the distillation of wax-bearing crude petroleum), paraffin scale slack wax and wax emulsions used for handle manufacture, polishes and waterproofing or containers, wrappings, etc.

69. **Petroleum Coke**

*Petroleum coke* refers to the solid residue consisting mainly of carbon, obtained by the distillation of heavier petroleum oils. It is used mainly in metallurgical processes. It excludes those solid residues obtained from carbonization of coal.

70. **Other Petroleum Products**

*Other petroleum products* refer to products of petroleum origin (including partially refined products) not otherwise specified.

71. **LPG and Refinery Gas**

*Liquefied petroleum gases (LPG)* include :

- Hydrocarbons extracted by stripping of natural gas at crude petroleum and natural gas sources.
- Hydrocarbons extracted by stripping of imported natural gas in installations of the importing country.
- Hydrocarbons produced both in refineries and outside refineries in the course of processing crude petroleum or its derivatives. it includes mainly propane, butane, isobutene and ethane.

72. **Natural Gas**

*Natural gas* includes both- associated natural gas (i.e. that originating from fields producing only hydrocarbons in gaseous form) and associated natural gas (i.e. that originating from fields producing both liquid and gaseous hydrocarbons) and also methane stripped at casing heads or recovered in coal mines and sewage gas. Natural gas liquefied for transportation (NGL) is excluded.

73. **Electricity Production**

- Electricity production include the gross production of consumption in use at the station attendants and lost in transit/transformers considered part of the station.

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

- Listrik umum adalah listrik yang dihasilkan untuk tujuan dijual dengan memproduksi, mentransmisikan dan mendistribusikan energi listrik. Ini dilaksanakan oleh perusahaan swasta, koperasi, pemerintah daerah/desa dan pemerintah pusat.
  - Listrik yang diproduksi dan digunakan sendiri adalah listrik yang diproduksi untuk memenuhi kebutuhan sendiri. Misalnya rumah tangga atau perusahaan industri yang memproduksi listrik yang digunakan untuk keperluan rumah tangga atau perusahaan tersebut.
74. **Produksi Tenaga Air dan Panas Bumi**  
Produksi meliputi produksi kotor, termasuk konsumsi dari stasiun pembantu tambahan dan banyak transmisi yang hilang karena mempertimbangkan integrasi bagian dari stasiun. Terdiri dari tenaga listrik yang dibangkitkan dari tenaga air dan tenaga panas bumi. Tenaga listrik ini merupakan energi primer.
75. **Energi Biomassa**  
Energi biomassa adalah pengembangan dari materi organik, suatu energi terbarukan dan berkelanjutan yang digunakan untuk menghasilkan energi listrik atau bentuk energi lainnya. Energi biomassa terdiri dari kayu bakar, arang, sisa hewan, biofuel cair, dan biogas.
76. **Kayu Bakar**  
Kayu bakar adalah jumlah seluruh kayu kasar yang digunakan untuk bahan bakar.
77. **Arang**  
Arang adalah sisa-sisa padat yang utamanya berisi karbon yang diperoleh dari pembakaran pada ketiadaan udara.
78. **Sisa Hewan**  
Sisa hewan adalah kotoran hewan, daging, dan sisa ikan, ketika kering, digunakan langsung sebagai bahan bakar. Tidak termasuk sat sisa yang digunakan tanaman fermentasi. Bahan bakar gas dari tanaman ini termasuk kedalam biogas.
79. **Biofuel Cair**  
Biofuel cair adalah cairan yang terbentuk dari biomassa dan digunakan sebagai bahan bakar. Cairan biofuel terdiri dari biogasoline, biodiesel, biojet kerosin, dan cairan biofuel lainnya. Bahan bakar diatas biasanya digunakan untuk transportasi, generator listrik, dan mesin stasioner.
- *Public (electricity profiles only) comprises the undertakings whose essential purpose is the production, transmission and distribution of electric energy. These may be private companies, co operative organizations, local of regional authorities, nationalized undertakings or governmental organizations.*
- *Self-producer (electricity profiles only) includes undertakings which, in addition to their main activities, themselves produce individually or in combination) electric energy intended, in whole or in part, to meet their own needs.*
74. **Hydro and Geothermal Production**  
*Production refers to gross production, which includes the consumption by station auxiliaries and any losses in the transformers that are considered integral parts of the station. Also included is the total production of electric energy produced by pump storage installations.*
75. **Biomass Energy**  
*Biomass energy fuel that is developed from organic materials, a renewable and sustainable source of energy used to create electricity or other forms of power. Biomass energy comprised fuel wood, charcoal, animal waste, liquid biofuel, and biogas.*
76. **Fuel Wood**  
*Fuel wood comprises the volume of all wood (coniferous and non coniferous) in the rough used for fuel purposes.*
77. **Charcoal**  
*Charcoal comprises the solid residue consisting mainly of carbon obtained by the destructive distillation of wood in the absence of air.*
78. **Animal Waste**  
*Animal waste is excreta of animals, meat and fish residues which, when dry, are used directly as a fuel. This excludes waste used in anaerobic fermentation plants. Fuel gases from these plants are included under biogases.*
79. **Liquid Biofuel**  
*Liquid biofuel is liquids derived frombiomass and used as fuels. Liquid biofuels comprise biogasoline, biodiesels, bio jet kerosene and other liquid biofuels. They are used for transport, electricity generation and stationary engines.*

80. **Biogas**

Biogas adalah gas yang keluar dari fermentasi anaerobik dari biomasa dan gasifikasi dari biomasa padat (termasuk sisa biomassa).

81. **Nuklir**

Nuklir adalah panas yang diperoleh dari reaksi nuklir, untuk menghasilkan panas atau listrik sebagai produk energi. Jika menghasilkan listrik, nuklir mengacu pada input panas primer teoritis dengan asumsi 33% efektif dari konversi panas nuklir primer menjadi listrik nuklir sekunder. Dengan demikian, konversi yang sesuai tercermin dalam baris transformasi dari keseimbangan.

82. **Lahan Sawah**

Lahan sawah adalah lahan pertanian yang berpetak-petak dan dibatasi oleh pematang, saluran untuk menahan/menyalurkan air, yang biasanya ditanami padi sawah.

83. **Lahan Pertanian bukan Sawah**

Lahan pertanian bukan sawah adalah semua lahan pertanian selain lahan sawah. Lahan pertanian bukan sawah yang disajikan dalam publikasi ini terdiri dari tegal/kebun, ladang/huma, dan lahan yang sementara tidak diusahakan.

84. **Hutan**

Hutan adalah suatu kesatuan ekosistem berupa hamparan lahan berisi sumber daya alam hayati yang didominasi pepohonan dalam persekutuan alam lingkungannya, yang satu dengan lainnya tidak dapat dipisahkan.

85. **Kawasan Hutan**

Kawasan hutan adalah wilayah tertentu yang ditunjuk dan/atau ditetapkan oleh pemerintah untuk dipertahankan keberadaannya sebagai hutan tetap.

86. **Penunjukan Kawasan Hutan**

- Kawasan hutan Indonesia ditetapkan oleh Menteri Lingkungan Hidup dan Kehutanan dalam bentuk Surat Keputusan Menteri Lingkungan Hidup dan Kehutanan tentang Penunjukan Kawasan Hutan dan Perairan Provinsi.
- Penunjukan Kawasan Hutan ini disusun berdasarkan hasil pemaduserasian antara Rencana Tata Ruang Wilayah Provinsi (RTRWP) dengan Tata Guna Hutan Kesepakatan (TGHK).

80. **Biogas**

*Biogas is gases arising from the anaerobic fermentation of biomass and the gasification of solid biomass (including biomass in wastes).*

81. **Nuclear**

*Nuclear refers to heat obtained from nuclear reactions, whether to produce Heat or Electricity as an energy product. If the output is Electricity, Nuclear refers to the theoretical primary heat input assuming a 33% efficiency from converting such primary nuclear heat into the secondary nuclear electricity. As such, the corresponding conversion is reflected in the transformation rows of the balance.*

82. **Wetland**

*Wetland is agricultural land that separated by small dykes to resist water, where the main crop is usually paddy.*

83. **Agricultural Dryland**

*Agricultural dryland is all agricultural land except wetland. The presented dryland in this publication consist of dry field/garden, unirrigated agricultural field/shifting cultivation land, and temporarily unused land.*

84. **Forest**

*Forest is an ecosystem unit in the form of a stretch of land containing biological natural resources which is dominated by deep trees the natural alliance of the environment, which cannot be separated from one another.*

85. **Forest Area**

*Forest Area is a specific territory determined and/or decided by the government as a permanent forest.*

86. **Designation of Forest Area**

- Indonesian forest area is determined by the Minister of Environment and Forestry in the format of Ministerial Decree on the Designation of Provincial Forest Area and Inland Water, Coastal, and Marine Ecosystem.
- The designation of Forest Area is formulated based on integrated and harmonized of Provincial Spatial Planning and Forest Land Use by Consensus.

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

- Penunjukan kawasan hutan mencakup pula kawasan perairan yang menjadi bagian dari Kawasan Suaka Alam (KSA) dan Kawasan Pelestarian Alam (KPA).
- Berdasarkan Undang-Undang No. 41 Tahun 1999 tentang Kehutanan, kawasan hutan dibagi ke dalam kelompok Hutan Konservasi, Hutan Lindung, dan Hutan Produksi.

### 87. Pemanfaatan Hutan

Pemanfaatan hutan adalah kegiatan untuk memanfaatkan kawasan hutan, memanfaatkan jasa lingkungan, memanfaatkan hasil hutan kayu dan bukan kayu, memungut hasil hutan kayu dan bukan kayu serta mengolah dan memasarkan hasil hutan secara optimal dan adil untuk kesejahteraan masyarakat dengan tetap menjaga kelestariannya.

### 88. Pemanfaatan Kawasan

Pemanfaatan kawasan adalah kegiatan untuk memanfaatkan ruang tumbuh sehingga diperoleh manfaat lingkungan, manfaat sosial, dan manfaat ekonomi secara optimal dengan tidak mengurangi fungsi utamanya.

### 89. Pemanfaatan Hasil Hutan Bukan Kayu

Pemanfaatan hasil hutan bukan kayu adalah kegiatan untuk memanfaatkan dan mengusahakan hasil hutan berupa bukan kayu dengan tidak merusak lingkungan dan tidak mengurangi fungsi pokoknya.

### 90. Pemanfaatan Hasil Hutan Kayu

Pemanfaatan hasil hutan kayu adalah kegiatan untuk memanfaatkan dan mengusahakan hasil hutan berupa kayu dengan tidak merusak lingkungan dan tidak mengurangi fungsi pokoknya.

### 91. Hasil Hutan Kayu (Hutan Alam)

Pemanfaatan hasil hutan kayu yang tumbuh alami (hutan alam) yang meliputi kegiatan penebangan atau pemanenan, pengayaan, pembibitan, penanaman, pemeliharaan, pengamanan, pengolahan, dan pemasaran. Kegiatan ini sebelumnya dikenal sebagai Hak Pengusahaan Hutan (HPH).

### 92. Hasil Hutan Kayu (Hutan Tanaman)

Pemanfaatan hasil hutan kayu budidaya tanaman (hutan tanaman) yang meliputi kegiatan penyiapan lahan, pembibitan, penanaman, pemeliharaan, pengamanan, pemanenan, pengolahan, dan pemasaran. Kegiatan ini sebelumnya dikenal sebagai Hak Pengusahaan Hutan Tanaman Industri (HTI).

- The designation of forest area in some cases also cover inland water, coastal, and marine ecosystem that may become part of Sanctuary Reserve Area and Nature Conservation Area.
- According to the Act on Forestry No. 41/1999, forest area is categorized as Conservation Forest, Protection Forest, and Production Forest.

### 87. Forest Utilization

Forest utilization is an activity to utilize forest areas, utilize environmental services, utilize timber and non-timber forest products, collect timber and non-timber forest products and process and market forest products optimally and fairly for the welfare of the community while maintaining their sustainability.

### 88. Area Utilization

Area utilization is an activity to utilize the growing space so that environmental benefits, social benefits, and economic benefits are optimally obtained without reducing its main function.

### 89. Utilization of Non-Timber Forest Products

Utilization of Non-Timber Forest Products is an activity to utilize and cultivate forest products in the form of non-timber without damaging the environment and not reducing its main functions.

### 90. Utilization of Timber Forest Products

Utilization of Timber Forest Products is an activity to utilize and cultivate forest products in the form of timber without damaging the environment and not reducing its main function.

### 91. Timber Forest Products (Natural Forest)

Utilization of timber forest products that grow naturally (natural forest) which includes logging or harvesting, enrichment, seeding, planting, maintenance, security, processing, and marketing activities. This activity was previously known as Forest Concession Rights.

### 92. Timber Forest Products (Plantation Forest)

Utilization of timber forest products for plant cultivation (plantation forest) which includes land preparation, seeding, planting, maintenance, security, harvesting, processing, and marketing activities. This activity was previously known as Industrial Plantation Forest Concession Rights.

**93. Pemungutan Hasil Hutan Kayu dan/atau Bukan Kayu**

Pemungutan hasil hutan kayu dan/atau bukan kayu adalah kegiatan untuk mengambil hasil hutan baik berupa kayu dan/atau bukan kayu.

**94. Perizinan Berusaha Pemanfaatan Hutan**

Perizinan Berusaha Pemanfaatan Hutan yang selanjutnya disingkat PBPH adalah perizinan berusaha yang diberikan kepada pelaku usaha untuk memulai dan menjalankan usaha dan/atau kegiatan pemanfaatan hutan.

**95. Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Alam (IUPHHK-HA)**

Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Alam (IUPHHK-HA) adalah izin pada segala bentuk usaha yang memanfaatkan dan mengusahakan hasil hutan kayu dengan tidak merusak lingkungan dan tidak mengurangi fungsi pokok hutan. Kegiatan ini hanya dapat dilaksanakan pada areal hutan produksi yang memiliki potensi untuk dilakukan kegiatan pemanfaatan hasil hutan kayu yang kegiatannya terdiri dari pemanenan atau penebangan, pengayaan, pemeliharaan, dan pemasaran hasil hutan kayu.

**96. Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Tanaman (IUPHHK-HT)**

Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Tanaman (IUPHHK-HT) adalah izin usaha untuk membangun hutan tanaman pada hutan produksi yang dibangun oleh kelompok industri untuk meningkatkan potensi dan kualitas hutan produksi dalam rangka memenuhi kebutuhan bahan baku industri.

**97. Izin Pemanfaatan Kayu (IPK)**

Izin Pemanfaatan Kayu (IPK) adalah izin yang diberikan oleh pejabat berwenang untuk melaksanakan penebangan dan pemanfaatan kayu dari kawasan hutan untuk pembangunan perkebunan.

**98. Hasil Hutan Kayu**

Hasil Hutan Kayu adalah benda-benda hayati yang berupa hasil hutan kayu yang berasal dari hutan berupa hasil hutan kayu yang tumbuh alami (hutan alam) dan/atau hasil hutan kayu hasil budidaya tanaman (hutan tanaman) pada hutan produksi.

**93. Timber and/or Non-Timber Forest Product Collection**

*Timber and/or Non-Timber Forest Product Collection is an activity to extract forest products in the form of timber and/or non-timber.*

**94. Forest Utilization Business Permit**

*Forest Utilization Business Permit is a business permit granted to business actors to start and run a business and/or forest utilization activity.*

**95. Forest Concession**

*Forest Concession (IUPHHK-HA) is a permit for all forms of business that utilizes and cultivates wood forest products without damaging the environment and reducing the main functions of the forest. This activity is only in production forest areas that have the potential to carry out activity utilization of wood forest products consisting of harvesting or logging, enrichment, maintenance, and marketing of timber forest products.*

**96. Timber Establishment**

*Timber Establishment (IUPHHK-HT) is a business license to develop plantations in production forests that are built by industrial groups to increase the potential and quality of production forests in order to meet the needs of industrial raw materials.*

**97. Timber Utilization Permit**

*Timber utilization permit is a license granted by authorized officials to carry out logging and timber utilization from forest areas for plantation development.*

**98. Timber Forest Product**

*Timber forest products are biological objects in the form of timber forest products originating from forests in the form of naturally growing timber forest products (natural forest) and/or timber forest products resulting from plant cultivation (plantation forest) in production forests.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

99. **Hasil Hutan Kayu Bukan Kayu**  
Hasil Hutan Bukan Kayu yang selanjutnya disingkat HHBK adalah hasil hutan hayati selain kayu baik nabati maupun hewani beserta produk turunan dan budidaya yang berasal dari hutan.
100. **Hutan Lindung**  
Hutan Lindung adalah kawasan hutan yang mempunyai fungsi pokok sebagai perlindungan sistem penyangga kehidupan untuk mengatur tata air, mencegah banjir, mengendalikan erosi, mencegah intrusi air laut, dan memelihara kesuburan tanah.
101. **Hutan Produksi**  
Hutan Produksi adalah kawasan hutan yang mempunyai fungsi pokok memproduksi hasil hutan. Hutan produksi terdiri dari Hutan Produksi Tetap (HP), Hutan Produksi Terbatas (HPT), dan Hutan Produksi yang dapat dikonversi.
102. **Hutan Produksi Tetap**  
Hutan Produksi Tetap (HP) adalah kawasan hutan dengan faktor-faktor kelas lereng, jenis tanah dan intensitas hujan setelah masing-masing dikalikan dengan angka penimbang mempunyai jumlah nilai dibawah 125, di luar kawasan lindung, hutan suaka alam, hutan pelestarian alam dan taman buru.
103. **Hutan Produksi Terbatas**  
Hutan Produksi Terbatas (HPT) adalah kawasan hutan dengan faktor-faktor kelas lereng, jenis tanah dan intensitas hujan setelah masing-masing dikalikan dengan angka penimbang mempunyai jumlah nilai antara 125-174, di luar kawasan lindung, hutan suaka alam, hutan pelestarian alam dan taman buru.
104. **Hutan Produksi yang Dapat Dikonversi**  
Hutan Produksi yang Dapat Dikonversi (HPK) adalah kawasan hutan yang secara ruang dicadangkan untuk digunakan bagi pembangunan di luar kehutanan.
105. **Areal Penggunaan Lain**  
Areal Penggunaan Lain (APL) adalah tanah negara yang diperuntukkan bagi kegiatan non kehutanan.
106. **Deforestasi**  
Deforestasi merupakan perubahan secara permanen dari areal berhutan menjadi tidak berhutan.
99. **Non-Timber Forest Product**  
*Non-timber forest products are biological forest products other than wood, both vegetable and animal along with derivative and cultivation products originating from the forest.*
100. **Protection Forest**  
*Protection Forest is a forest area designated to serve life support system, maintain hydrological system, prevent flood, erosion control, seawater intrusion, and maintain soil fertility.*
101. **Production Forest**  
*Production Forest is a forest area designated mainly to promote sustainable forest production. Production forest consists of permanent production forest, limited production forest, and convertible production forest.*
102. **Permanent Production Forest**  
*Permanent Production Forest is a forest area with factors of slope class, soil type and rainfall intensity after each multiplied by the weighing number having a value below 125, outside the protected area, nature reserve forest, nature conservation forest and hunting park.*
103. **Limited Production Forest**  
*Limited Production Forest is a forest area with factors of slope class, soil type and rainfall intensity after each multiplied by the weighing number having a value between 125-174, outside the protected area, nature reserve forest, nature conservation forest and hunting park.*
104. **Convertible Production Forest**  
*Convertible Production Forest is a forest area that is space reserved for use for development outside forestry.*
105. **Other Use Area**  
*Other Use Area is state land intended for non-forestry activities.*
106. **Deforestation**  
*Deforestation is a permanent change from forested to non-forested areas.*

107. **Luas Deforestasi Netto**

Luas deforestasi netto, yaitu perubahan/pengurangan luas tutupan lahan dengan kategori berhutan pada kurun waktu tertentu. Luas deforestasi netto diperoleh dari perhitungan deforestasi bruto dikurangi dengan reforestasi.

108. **Reboisasi**

Reboisasi atau rehabilitasi hutan bertujuan untuk menghutankan kembali kawasan hutan yang kritis di wilayah daerah aliran sungai (DAS) yang dilaksanakan bersama masyarakat secara partisipatif.

109. **Hutan Konservasi**

Hutan Konservasi adalah kawasan hutan dengan ciri khas tertentu yang mempunyai fungsi pokok pengawetan keanekaragaman tumbuhan dan satwa serta ekosistemnya. Hutan Konservasi terdiri dari Kawasan Suaka Alam, Kawasan Pelestarian Alam, dan Taman Buru.

110. **Kawasan Suaka Alam**

Kawasan Suaka Alam (KSA) adalah kawasan dengan ciri khas tertentu, baik di darat maupun di perairan yang mempunyai fungsi pokok sebagai kawasan pengawetan keanekaragaman tumbuhan dan satwa serta ekosistemnya, yang juga berfungsi sebagai wilayah sistem penyangga kehidupan. Kawasan suaka alam berupa Cagar Alam (CA) dan Suaka Margasatwa (SM).

111. **Kawasan Pelestarian Alam**

Kawasan Pelestarian Alam (KPA) adalah kawasan dengan ciri khas tertentu, baik di darat maupun di perairan, yang mempunyai fungsi pokok perlindungan sistem penyangga kehidupan, pengawetan keanekaragaman jenis tumbuhan dan satwa, serta pemanfaatan secara lestari sumber daya alam hayati dan ekosistemnya. Kawasan pelestarian alam berupa Taman Nasional (TN), Taman Hutan Raya (THR), dan Taman Wisata Alam (TWA).

112. **Neraca Aset Sumber Daya Kayu**

Neraca aset sumber daya kayu menyajikan informasi yang menggambarkan kondisi stok ketersediaan sumber daya kayu dalam proses, penambahan, serta pengurangannya. Sehingga, dapat diketahui kecenderungan naik atau turunnya sumber daya kayu pada periode tertentu.

107. **Net Deforestation Area**

*Net deforestation area, i.e. the change/reduction of land cover with the category of forested in a certain period of time. The area of net deforestation is obtained from the calculation of gross deforestation reduced by reforestation.*

108. **Reforestation**

*Reforestation or forest rehabilitation is intended to rehabilitate the critical land inside forest areas or watersheds to improve their ecological and hydrological functions, which are conducted with active participation of local communities who live nearby the target area.*

109. **Conservation Forest**

*Conservation Forest is a forest area with specific characteristic to conserve animal and plant species as well as ecosystem. Conservation Forest divided into Sanctuary Reserve, Nature Conservation Area, and Hunting Park.*

110. **Sanctuary Reserve Area**

*A Sanctuary Reserve Area is a specific terrestrial or aquatic area with specific criteria for preserving biodiversity plant and animal as well as ecosystem, which also serves as a live support system. Sanctuary Reserve area consists of Strict Nature Reserve and Wildlife Sanctuary.*

111. **Nature Conservation Area**

*A Nature Conservation Area is a specific terrestrial or aquatic area with a main function is to serve life support system and preserve diversity of plant and animal species, as well as to provide a sustainable utilization of living resources and their ecosystems. Nature conservation area consists of National Park, Grand Forest Park, and Nature Recreation Park.*

112. **Asset Accounts for Timber Resources**

*Asset accounts for timber resources present information that describes the condition of the stock availability of timber resources in the process, additions, and removals. Thus, it can be used to see the rise or fall tendency of the timber resources in a certain period.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

113. **Perubahan pada Stok Sumber Daya Kayu**  
Perubahan pada stok sumber daya kayu dapat disebabkan oleh beberapa faktor, diantaranya penambahan stok dirinci menurut pertumbuhan alami dan reklasifikasi (reboisasi dan penanaman); pengurangan stok dirinci menurut penebangan serta kerusakan dan reklasifikasi (kerusakan alami dan kerusakan karena bencana).
114. **Kayu Bulat**  
Kayu bulat adalah produksi hasil hutan utama yang dihasilkan dari hutan. Produksi kayu bulat ini dihasilkan dari hutan alam melalui kegiatan perusahaan pemegang Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Alam (IUPHHK-HA) yang sebelumnya disebut Hak Pengusahaan Hutan (HPH), kegiatan perusahaan pemegang Izin Usaha Pemanfaatan Hasil Hutan Kayu pada Hutan Tanaman (IUPHHK-HT), kegiatan Izin Pemanfaatan Kayu (IPK) dalam rangka pembukaan wilayah hutan, serta kegiatan hutan rakyat.
115. **Kayu Olahan**  
Kayu olahan adalah produk hasil pengolahan hasil hutan kayu yang dapat digunakan sebagai bahan baku, misal untuk pembuatan furnitur dan interior. Beberapa contoh jenis kayu olahan: Kayu Gergajian, Kayu Lapis, Bubur Kayu, Serpih Kayu, dan Veneer,
116. **Kayu Lapis**  
Kayu lapis adalah panel kayu yang tersusun dari lapisan veneer di bagian luarnya, sedangkan di bagian intinya (core) bisa berupa veneer atau material lain, diikat dengan lem kemudian di-press (ditekan) sedemikian rupa sehingga menjadi panel yang kuat. Termasuk dalam artian ini adalah kayu lapis yang dilapisi lagi dengan material lain.
117. **Kayu Gergajian**  
Kayu gergajian merupakan kayu hasil konversi kayu bulat dengan menggunakan mesin gergaji, mempunyai bentuk yang teratur dengan sisi-sisi sejajar dan sudut-sudutnya siku dengan ketebalan tidak lebih dari 6 cm dan kadar air tidak lebih dari 18 persen. Kayu gergajian yang diolah langsung dari kayu bulat, wajib didukung dengan dokumen yang sah.
118. **Statistik Perikanan**  
Statistik perikanan dibedakan atas data Perikanan Tangkap dan Perikanan Budidaya.  
• Perikanan Tangkap diklasifikasikan atas perikanan tangkap di laut dan perikanan tangkap di perairan darat.
113. **Changes in Stock of Timber Resources**  
*The changes in stock of timber resources might be caused by several factors, including additions to stock are detailed according to natural growth and reclassification (reforestation and planting); reductions in stock are detailed according to removals as well as losses and reclassification (natural losses and catastrophic losses).*
114. **Log**  
*Log is the main product of commercial forest operation harvested from various sources such as natural forest granted to concessionaires, industrial forest plantation, land clearing activities, and community forest.*
115. **Processed Wood**  
*Processed wood is a product resulting from the processing of wood forest products that can be used as raw materials, such as for manufacturing of furniture and interiors. Some examples of processed wood types: Sawn Timber, Plywood, Pulp, Wood Chips, and Veneer.*
116. **Plywood**  
*Plywood is wood panel consisting of layers pressed together in between veneers; the core may be a veneer or some other material, bound together with glue and pressed tightly together to make a strong panel, including plywood covered with materials other than veneer.*
117. **Sawn Timber**  
*Sawn Timber constitutes a sawmill product derived from logs as raw material. The product is characterized with regular forms having parallel sides at right angle to each other, thickness not more than 6 cm, and moisture content not to exceed 18 percent. Sawn timber produced directly from logs must be certified by a legal document.*
118. **Fisheries Statistics**  
*Fishery statistics are categorized into capture fisheries and aquaculture.*  
• *Capture fisheries are further classified into marine capture fisheries and inland water capture fisheries.*

- Perikanan Budidaya diklasifikasikan atas jenis budidaya yaitu jaring apung laut, jaring apung tawar, jaring tancap tawar, karamba, kolam air deras, kolam air tenang, laut lainnya, minapadi, rumput laut, tambak intensif, tambak sederhana, dan tambak semi intensif.

### 119. Perikanan Tangkap

Perikanan tangkap adalah kegiatan menangkap atau mengumpulkan ikan/ binatang air lainnya/ tanaman air yang hidup di laut/perairan umum secara bebas dan bukan milik perseorangan.

### 120. Perikanan Budidaya

Perikanan Budidaya adalah usaha pemeliharaan dan pengembang biakan ikan atau organisme air lainnya.

### 121. Produksi Ikan

Produksi ikan adalah semua hasil penangkapan/ budidaya ikan/binatang air lainnya/tanaman air yang ditangkap/dipanen dari sumber perikanan alami atau dari tempat pemeliharaan, baik yang diusahakan oleh perusahaan perikanan maupun rumah tangga perikanan. Volume produksi dihitung dalam bentuk berat basah ikan hasil tangkapan/budidaya.

### 122. Data Tanaman Pangan

Data pokok tanaman pangan yang dikumpulkan oleh Badan Pusat Statistik adalah luas panen dan produktivitas (hasil per hektar). Produksi merupakan hasil perkalian antara luas panen dan produktivitas.

### 123. Luas Panen Padi

Sejak 2018, data luas panen padi diperoleh dari hasil Survei Kerangka Sampel Area (KSA). Sebelum penerapan KSA, data luas panen padi dikumpulkan melalui pelaporan data Statistik Pertanian (SP) oleh Kepala Cabang Dinas (KCD) dengan menggunakan sejumlah pendekatan, seperti sistem blok pengairan, penggunaan benih, dan *eye-estimate*.

### 124. Produktivitas Padi, Jagung, dan Kedelai

- Angka produktivitas padi, jagung, dan kedelai diperoleh dari hasil Survei Ubinan dengan melakukan pengukuran hasil panen pada plot berukuran 2,5m x 2,5m.

- *Aquaculture are further classified into several types of cultivation: Marine Floating Net, Freshwater Floating Net, Freshwater Pen Culture, Cage, Running Freshwater Pond, Quiet Freshwater Pond, Other Marine Culture, Rice Fish, Sea Weed, Intensive Brackishwater Pond, Traditional Brackishwater Pond, and Semi Intensive Brackishwater Pond.*

### 119. Capture Fisheries

*Capture fisheries is an economic activities to catch or collect fishes/other aquatic animals/aquatic plants that grow naturally in inland openwater/ marine areas and no belong to the property of any person.*

### 120. Aquaculture

*Aquaculture is raise and breeding effort of fish or other aquatic organisms.*

### 121. Fish Production

*Fish production is the outcome of catching/ cultivating fish or other aquatic animals including plants that are caught/harvested from natural fishery sources or from captivity, either managed by fishery companies or fishery households. Production volume is calculated form the weight of the fish caught/cultivated.*

### 122. Food Crops Data

*The main data of food crops collected by BPS- Statistics Indonesia are harvested area and productivity (yield per hectare). Production is the result of multiplication between harvested area and yield per hectare.*

### 123. Harvested Area of Paddy

*Since 2018, paddy harvested area data have been obtained from the results of the Area Sampling Frame (ASF) Survey. Before the implementation of ASF, they were collected through the Agriculture Statistics report (called SP for Statistik Pertanian) collected by the Agricultural Extension Officer (called KCD for Kepala Cabang Dinas) making use of conventional approaches, namely irrigation block system, seed use, and eye-estimate.*

### 124. Yield of Paddy, Maize, and Soybean

- *Yield figures of paddy, maize, and soybean were obtained through the Crop-cutting Survey by conducting cropcutting experiments on plot sized 2,5m x 2,5m.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

- Khusus untuk padi, hasil panen diukur dalam bentuk Gabah Kering Panen (GKP) yang dikonversi ke dalam Gabah Kering Giling (GKG) dengan menggunakan angka konversi GKP ke GKG hasil Survei Konversi Gabah ke Beras 2018.
  - Angka produktivitas padi level provinsi diperoleh berdasarkan hasil penghitungan dari produksi padi dibagi dengan luas panen level provinsi.
125. **Luas Lahan Baku Sawah**  
Data luas baku lahan sawah yang digunakan sebagai dasar penghitungan luas panen adalah Luas Baku Lahan Sawah Nasional terbaru berdasarkan Keputusan Menteri ATR/Kepala BPN-RI No. 686/SK-PG.03.03/XII/2019 tanggal 17 Desember 2019. Luas lahan baku sawah nasional tahun 2019 adalah sebesar 7.463.948 hektar.
126. **Survei Pertanian Hortikultura (SPH)**  
Survei Pertanian Hortikultura (SPH) diselenggarakan oleh Badan Pusat Statistik bekerja sama dengan Direktorat Jenderal Hortikultura, Kementerian Pertanian.
127. **Perubahan Komoditas dalam Survei Pertanian Hortikultura (SPH)**  
Pada tahun 2021, terjadi perubahan komoditas yang dikumpulkan dalam SPH. Komoditas yang datanya tidak dikumpulkan adalah kacang merah, lobak, blewah, markisa, adenium, anthurium daun, *caladium*, *diefenbachia*, *euphorbia*, gladiol, *monstera*, dlingo/dringo, dan keji beling. Sedangkan komoditas yang baru dikumpulkan adalah cabai keriting, jamur merang, jamur tiram, jamur lainnya, jeruk lemon, lengkeng, buah naga, anggrek pot, anggrek potong, bromelia, puring, bugenvil, jeruk nipis, dan serai.
128. **Metode Survei Pertanian Hortikultura (SPH)**  
Metode yang digunakan dalam survei ini adalah pencacahan lengkap terhadap seluruh kecamatan di Indonesia dan dilaporkan secara rutin bulanan untuk SPH-SBS dan triwulanan untuk SPH-BST, SPH-TBF, SPH-TH oleh KCD.
129. **Kuesioner Survei Pertanian Hortikultura (SPH)**  
Kuesioner yang digunakan dalam pengumpulan data SPH mencakup :  
  - SPH-SBS digunakan untuk data tanaman sayuran dan buah-buahan semusim.
  - SPH-BST digunakan untuk data tanaman buahbuahan dan sayuran tahunan.
- For paddy, the yield was measured in the form of the harvested unhusked paddy (called GKP for Gabah Kering Panen), which was converted into the dry unhusked paddy (called GKG for Gabah Kering Giling) using a conversion rate obtained from the results of the 2018 Paddy to Rice Conversion Rates Survey.
- Yield figures of paddy at the provincial level are obtained based on the calculation results of paddy production divided by harvested area.
125. **Wetland Area**  
*The wetland area used as the basis for calculating the harvested area is the latest National Wetland Area based on the Decree of the Agrarian Affairs and Spatial Planning Minister/Chief of National Land Agency No. 686/SK-PG.03.03/XII/2019 December 17th, 2019. The wetland area in 2019 was 7,463,948 hectares.*
126. **Horticulture Agricultural Survey**  
*The Agricultural Survey for Horticulture (SPH) is carried out by the BPS-Statistics Indonesia in cooperation with the Directorate General of Horticulture, Ministry of Agriculture.*
127. **Change in Commodities of Horticulture Agricultural Survey**  
*In 2021, there was a change in the commodities collected in the SPH. Commodities for which data were not collected were red beans, radishes, cantaloupe, passion fruit, adenium, anthurium, caladium, dieffenbachia, euphorbia, gladiolus, monstera, calamus, and keji beling. While the new commodities collected in 2021 are curly chilies, straw mushrooms, oyster mushrooms, other mushrooms, lemons, longan, dragon fruit, potted orchids, cut orchids, bromeliads, croton, bougainvillea, lime, and lemongrass.*
128. **Horticulture Agricultural Survey Method**  
*The survey was using complete enumeration method for all of sub districts in Indonesia, reported monthly for SPH-SBS and quarterly for SPH-BST, SPH-TBF, SPHTH by agriculture extension workers.*
129. **Horticulture Agricultural Survey Questionnaire**  
*The Questionnaire used to collect the Agricultural Survey for Horticulture data are :*  
  - SPH-SBS was being used for data on seasonal vegetable and fruit plants.
  - SPH-BST was being used for data on annual fruit and vegetable plants.

- SPH-TBF digunakan untuk data tanaman biofarmaka.
- SPH-TH digunakan untuk data tanaman hias

## 130. Tanaman Sayuran Semusim

Tanaman sayuran semusim adalah tanaman yang bermanfaat sebagai sayur, sebagai sumber vitamin, mineral, dan lain-lain yang berumur kurang dari satu tahun. Pada umumnya, bagian yang digunakan sebagai sayur berupa daun, bunga, buah, dan umbi.

## 131. Tanaman Buah-Buahan Semusim

Tanaman buah-buahan semusim adalah tanaman yang menghasilkan buah segar sebagai sumber vitamin, mineral, dan lain-lain yang berumur kurang dari satu tahun dan berbatang lunak. Pada umumnya, buah yang dihasilkan dapat dikonsumsi tanpa dimasak terlebih dahulu.

## 132. Tanaman Sayuran Tahunan

Tanaman sayuran tahunan adalah tanaman yang bermanfaat sebagai sayur, sebagai sumber vitamin, mineral, dan lain-lain yang berumur satu tahun atau lebih. Pada umumnya, bagian yang digunakan sebagai sayur berupa daun, bunga, buah, dan umbi.

## 133. Tanaman Buah-Buahan Tahunan

Tanaman buah-buahan tahunan adalah tanaman yang menghasilkan buah segar sebagai sumber vitamin, mineral, dan lain-lain yang berumur satu tahun atau lebih dan berbatang keras. Pada umumnya, buah yang dihasilkan dapat dikonsumsi tanpa dimasak terlebih dahulu.

## 134. Tanaman Biofarmaka

Tanaman biofarmaka adalah tanaman yang bermanfaat untuk obat-obatan, kosmetik, dan kesehatan yang dikonsumsi atau digunakan dari bagian-bagian tanaman, seperti daun, batang, buah, umbi (rimpang), ataupun akar.

## 135. Tanaman Hias

Tanaman hias adalah tanaman yang mempunyai nilai keindahan, baik bentuk, warna daun, tajuk maupun bunganya, dan sering digunakan untuk penghias pekarangan dan lain sebagainya.

## 136. Pengumpulan Data Survei Pertanian Hortikultura (SPH)

Data yang dikumpulkan dalam SPH mencakup data tentang luas penanaman, luas panen (untuk buah-buahan tahunan adalah banyaknya tanaman yang menghasilkan), produksi, luas rusak, luas tanaman akhir, dan harga jual petani.

- SPH-TBF was being used for data on medicinal plants.
- SPH-TH was being used for data on ornamental plants.

## 130. Seasonal Vegetable Plants

Seasonal vegetable plants are used/consumed as vegetables, which are the sources of vitamin, mineral, etc that are aged less than one year. In general, parts that consumed are in the form of leaves, flower, fruits, and tubers.

## 131. Seasonal Fruit Plants

Seasonal fruit plants are plants that produce fresh fruit as a sources of vitamin, mineral, etc that are aged less than one year and soft trunked. Generally, the fruit produced can be consumed without being cooked first.

## 132. Annual Vegetable Plants

Annual vegetable plants are plants used as vegetables as sources of vitamin, mineral, etc that are aged more than one year. In general, the parts that consumed are in the form of leaves, flower, fruits, and tubers.

## 133. Annual Fruit Plants

Annual fruit plants are plants that produce fresh fruit as sources of vitamin, mineral, etc that are aged more than one year and hard trunked. Generally, the fruit produced can be consumed without being cooked first.

## 134. Medical Plants

Medicinal plants are plants which are useful for medicine, cosmetics, and health. It is consumed from part of the plant, such as leaf, flower, fruit, tuber, and root.

## 135. Ornamental Plants

Ornamental plants are plants which have a beauty value, either in shape, colour of leaf or crown of flower, and they are often used as a yard decorator.

## 136. Collect for Horticulture Agricultural Survey

The Agriculture Survey for Horticulture collects the information on the planted area, harvested area (for annual fruits is the number of production plant), production, damaged area, plant area in the end of period, and price on the farm-gate level.

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

137. **Produksi Hortikultura**  
Produksi adalah hasil menurut bentuk produk dari setiap tanaman sayuran, buah-buahan, biofarmaka, dan tanaman hias yang diambil berdasarkan luas yang dipanen/tanaman yang menghasilkan pada bulan/triwulan laporan.
138. **Luas Panen Hortikultura**  
Luas panen adalah luas tanaman sayuran, buah-buahan, biofarmaka, dan tanaman hias yang diambil hasilnya/dipanen pada periode pelaporan.
139. **Luas Panen Tanaman Sayuran**  
Luas panen untuk tanaman sayuran adalah luas tanaman yang dipanen sekaligus/habis/dibongkar dan luas tanaman yang dipanen berkali-kali (lebih dari satu kali)/belum habis.
140. **Tanaman yang Dipanen Sekaligus/Habis Dibongkar**  
Tanaman yang dipanen sekaligus/habis/dibongkar adalah tanaman yang sehabis panen langsung dibongkar/dicabut, terdiri dari bawang merah, bawang putih, bawang daun, kentang, kol/kubis, kembang kol, petsai/sawi, dan wortel.
141. **Tanaman yang Dipanen Berkali-Kali (Lebih dari Satu Kali)/Belum Habis**  
Tanaman yang dipanen berkali-kali (lebih dari satu kali)/belum habis adalah tanaman yang pemanenannya lebih dari satu kali dan biasanya dibongkar apabila panen terakhir sudah tidak memadai lagi, terdiri dari: kacang panjang, cabai besar, cabai rawit, jamur, tomat, terung, buncis, mentimun, labu siam, kangkung, bayam, melon, dan semangka.
142. **Perkebunan Besar**  
Perkebunan besar adalah perkebunan yang diselenggarakan atau dikelola secara komersial oleh perusahaan yang berbadan hukum. Perkebunan besar terdiri atas Perkebunan Besar Negara (PBN) dan Perkebunan Besar Swasta (PBS) Nasional/Asing.
143. **Pengumpulan Data Perkebunan Besar**
  - Pendataan perkebunan besar dilakukan dengan metode pencacahan lengkap melalui aplikasi SEDAPP Online dan SKB Online.
  - SEDAPP Online adalah aplikasi berbasis website untuk pelaporan data perusahaan perkebunan secara berkala kepada Badan Pusat Statistik.
137. **Production of Horticulture**  
*Production is the standard production quantity form of vegetable, fruit, medicinal, and ornamental plant based on harvested area/the number of production plants reported monthly/quarterly.*
138. **Harvested Area of Horticulture**  
*Harvested area is area which vegetable, fruit, medicinal and ornamental plant of crop harvested during the period of report.*
139. **Harvested Area of Vegetables**  
*Harvested area of vegetables is total area of the harvested crop either demolished or not.*
140. **Entirely Harvested/Demolished Plants**  
*Entirely harvested/demolished plants are plants usually harvested once then demolished to be substituted by other plants, consisting of: shallots, garlic, scallion, potato, cabbage, cauliflower, chinese cabbage, and carrots.*
141. **Plants that are Harvested Several Times/Undemolished**  
*Plants that are harvested several times/undemolished are define as plants usually harvested more than once then demolished in the case that the last production was economically not profitable. They consist of: long beans, chili/big chili, chili/cayenne pepper, mushroom, tomatoes, eggplant, string beans, cucumber, chayote, water spinach, spinach, melon, and watermelon.*
142. **Estates**  
*Estates are plantations organized or managed commercially by companies with legal entities. Estates comprise of Government Plantations and Private Plantations.*
143. **Collect for Estate Data**
  - Data on estates are collected using SEDAPP Online and SKB Online applications.
  - SEDAPP Online is a website based application used in reporting the data from Estate Crops Establishment periodically to the BPS-Statistics Indonesia.

- Pendataan perusahaan yang belum tercakup pada SEDAPP Online dilakukan melalui wawancara dengan administrasi perkebunan secara triwulanan melalui SKB Online. Komoditas yang dicakup pada SEDAPP Online yaitu komoditas kelapa sawit, karet, kakao, kopi, tebu, teh, dan tembakau. Untuk komoditas kelapa, jambu mete, pala, lada, cengkeh, dan nilam serta data perkebunan rakyat untuk semua komoditas diperoleh dari Direktorat Jenderal Perkebunan, Kementerian Pertanian.

### 144. Luas Tanaman Perkebunan Besar

Penghitungan luas tanaman perkebunan besar dilakukan pada akhir tahun dan tidak termasuk perkebunan dengan luas kurang dari lima hektar.

### 145. Produksi Perkebunan Besar

Bentuk produksi perkebunan meliputi karet kering (karet), daun kering (teh dan tembakau), biji kering (kopi dan coklat), kulit kering (kayu manis dan kina), serat kering (rami), bunga kering (cengkeh), gula kristal putih (tebu), ekivalen kopra (kopra), biji dan bunga (pala), serta minyak daun (sereh).

### 146. Ternak

Berdasarkan jenisnya, ternak dikelompokkan menjadi ternak besar (sapi potong, sapi perah, kerbau, dan kuda), ternak kecil (kambing, domba, dan babi), ternak unggas (ayam buras, ayam ras petelur, ayam ras pedaging, itik, dan itik manila), dan aneka ternak (kelinci dan puyuh).

### 147. Populasi Ternak

Populasi ternak adalah kumpulan atau jumlah ternak yang hidup pada wilayah dan waktu tertentu.

- Untuk populasi ayam ras pedaging (*broiler*) adalah populasi ayam ras pedaging komersial berdasarkan data produksi DOC ayam ras pedaging dari perusahaan pembibit didistribusikan ke provinsi yang hidup dan pernah hidup di dalam usaha budidaya selama setahun.
- Untuk populasi ayam ras petelur (*layer*) adalah jumlah ayam ras petelur komersial yang terdiri dari populasi induk muda (umur 1-18 minggu) maupun induk produktif (umur 19 minggu-afkir) berdasarkan data produksi DOC ayam ras petelur dari perusahaan pembibit selama 3 tahun produksi, didistribusikan ke provinsi yang hidup dan pernah hidup di dalam usaha budidaya selama periode pemeliharaan tertentu.

- *Data collection on an establishment that can't be covered in SEDAPP Online is collected using direct enumeration every three months. The commodities covered by SEDAPP Online are oil palm, rubber, cocoa, coffee, sugarcane, tea, and tobacco. Data on coconut, cashew, nutmeg, pepper, clove, and patchouli as well as on smallholder plantation, are acquired from the Directorate General of Estates, Ministry of Agriculture.*

### 144. Planted Areas of Estates

*Planted areas of estates refer to condition at the end of the year and exclude an estate having less than five hectares areas of land.*

### 145. Production of Estates Crops

*Production of estates crops are follows dry rubber (rubber), dry leaves (tea and tobacco), dry beans (coffee and cocoa), dry bark (cassia vera and cinchona), dry fibre (rosella), dry flowers/buds (cloves), white sugar (sugarcane), copra (copra), seeds and buds (nutmeg), and leaf oil (citronella).*

### 146. Livestock

*Based on its types, livestock is grouped into large livestock (beef cattle, dairy cattle, buffaloes, and horses), small livestock (goats, sheep, and pigs), poultry (native chickens, layers, broilers, ducks, and muscovy ducks), and various livestock (rabbits and quails).*

### 147. Livestock Population

*The livestock population is a collection or number of livestock living in a certain area and time.*

- *The broiler population is a commercial broiler population based on data on the broiler DOC production from breeding companies distributed to provinces that live and have lived in cultivation for a year.*
- *The layer population is the number of commercial laying breed chickens consisting of young parent population (ages 1-18 weeks) and productive parent (age 19 weeks - cull) based on DOC production data of laying breed chickens from the breeding company for 3 years of production, distributed to provinces that live and have lived in cultivation businesses during certain maintenance periods.*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

148. **Produksi dan Pemotongan Ternak**  
Produksi daging sapi, kerbau, kuda, kambing, domba, dan babi dalam bentuk karkas ditambah *edible portion*, dihitung berdasarkan pemotongan ternak tercatat (di RPH, selain di RPH, Qurban) dan pemotongan ternak tidak tercatat.
149. **Karkas Ruminansia**  
Karkas ruminansia adalah bagian dari tubuh ruminansia sehat yang telah disembelih secara halal dan benar, dikuliti, dikeluarkan jeroan, dipisahkan kepala, kaki mulai dari tarsus/karpus ke bawah, organ reproduksi dan ambing, ekor, serta lemak yang berlebih.
150. **Bagian yang Dapat Dimakan (*Edible Portion*)**  
Bagian yang dapat dimakan (*edible portion*) adalah organ-organ dan bagian selain karkas yang dapat dikonsumsi, meliputi jeroan (*edible offal*) dan daging variasi (*fancy meat*).
151. **Pemotongan Ternak Tercatat**  
Pemotongan ternak tercatat adalah pemotongan ternak yang dilakukan di Rumah Potong Hewan Ruminansia (RPH-R), Rumah Potong Hewan Babi (RPH-B), dan Rumah Potong Hewan Unggas (RPH-U), baik milik pemerintah maupun swasta, serta tempat pemotongan hewan selain RPH yang dilaporkan kepada dinas atau dicatat oleh dinas yang membidangi fungsi peternakan dan kesehatan hewan setempat.
152. **Pemotongan Ternak Tidak Tercatat**  
Pemotongan ternak tidak tercatat adalah pemotongan yang dilakukan oleh orang perorangan yang tidak dilaporkan kepada dinas atau tidak dicatat oleh dinas yang membidangi fungsi peternakan dan kesehatan hewan setempat.
153. **Jumlah Pemotongan Ternak**  
Jumlah pemotongan ternak merupakan hasil Survei Laporan Pemotongan Ternak BPS. Pengumpulan data pemotongan ternak pada tahun 2022 dilakukan secara lengkap setiap triwulan di seluruh Rumah Potong Hewan (RPH) dan Tempat Pemotongan Hewan (TPH) yang ada di Indonesia. Pada tahun 2022, terdapat 4.996 Dokumen RPH/TPH yang diolah dari hasil pencacahan.
148. **Livestock Production and Slaughtering**  
*The production of beef, buffalo, horse, mutton, lamb, and pork in the form of carcasses plus the edible portion is calculated based on registered livestock slaughtering (in Slaughtering Houses, other than in Slaughtering Houses, Qurban) and unregistered livestock slaughtering.*
149. **Ruminant Carcass**  
*Ruminant carcass is part of the body of a healthy ruminant that has been slaughtered in a lawful and proper manner, skinned, removed from the innards, separated from the head, legs from the tarsus/carpus downwards, reproductive organs and udder, tail, and excess fat.*
150. **Edible Portion**  
*The edible portion is organs and parts other than the carcass that can be consumed, including edible offal and fancy meat.*
151. **Registered Livestock Slaughtering**  
*Registered livestock slaughtering is livestock slaughtered at Ruminant Slaughtering Houses, Pig Slaughtering Houses, and Poultry Slaughtering Houses whether owned by the government or private companies, as well as abattoirs other than slaughtering houses which are reported to the service or registered by the service in charge of local livestock and animal health functions.*
152. **Unregistered Livestock Slaughtering**  
*Unregistered livestock slaughtering is slaughtering carried out by individuals which are not reported to the service or not registered by the service in charge of local livestock and animal health functions.*
153. **Number of Livestock Slaughtered**  
*The number of livestock slaughtered is the result of the BPS-Statistics Livestock Slaughter Report Survey. The collection of livestock slaughtering data in 2022 is carried out by census every quarter in all Slaughtering Houses and Abattoirs in Indonesia. In 2022, 4,996 Slaughtering Houses/ Abattoirs documents were processed from the enumeration results.*

154. **Rumah Pemotongan Hewan (RPH)**

Rumah Pemotongan Hewan adalah semua tempat pemotongan hewan/ ternak yang mempunyai bangunan permanen atau semi permanen yang khusus digunakan untuk tempat pemotongan hewan/ternak yang telah ditetapkan oleh pemerintah sebagai RPH.

155. **Tempat Pemotongan Hewan (RPH)**

Tempat Pemotongan Hewan adalah semua tempat pemotongan hewan/ternak yang mempunyai bangunan maupun tidak yang biasanya digunakan sebagai tempat pemotongan hewan/ternak dan biasanya terdapat pencatatan pemotongan.

156. **Produksi Ternak**

Produksi adalah hasil dari usaha budidaya ternak berupa daging, telur, dan susu.

157. **Produksi Daging Ternak**

Produksi daging adalah karkas hasil pemotongan ternak di wilayah tersebut ditambah dengan *edible offal* (bagian yang dapat dimakan) selama waktu tertentu.

158. **Produksi Telur Unggas**

Produksi telur adalah jumlah produksi telur unggas (ayam buras, puyuh, itik, dan itik manila) selama setahun, termasuk yang ditetaskan, rusak, diperdagangkan, dikonsumsi, dan diberikan ke orang lain.

159. **Produksi Daging Ayam Ras Pedaging**

Produksi daging ayam ras pedaging (*broiler*) adalah volume produksi daging ayam ras (Ton/ Kg) yang dihitung berdasarkan data jumlah *DOC Final Stock (FS)* ayam ras pedaging yang dilaporkan oleh perusahaan pembibit, didistribusikan ke tiap provinsi yang hidup dan pernah hidup dibudidayakan selama setahun dengan menggunakan parameter teknis secara nasional. Parameter teknis sebagai berikut :

- Daya hidup 95%, deplesi 5%
- Bobot hidup terpanen 1,72 Kg
- Konversi karkas 70%.

160. **Produksi Telur Ayam Ras Petelur**

Produksi telur ayam ras petelur (*layer*) adalah volume produksi telur yang dihasilkan dari populasi induk produktif (mulai umur 19 minggu - Afkir), tersebar di Provinsi yang hidup dan pernah hidup hasil budidaya selama periode pemeliharaan tertentu dengan menggunakan parameter perhitungan secara nasional. Parameter teknis sebagai berikut :

154. **Slaughtering House**

*Slaughtering Houses are slaughtering places that have permanent or semi-permanent buildings are specifically used for the slaughterhouse/that have been designated by the government as RPH*

155. **Slaughtering Place**

*Slaughtering Places are slaughtering places that have building or not. That normally used as a slaughterhouse and there are usually have a recording of slaughtered.*

156. **Livestock Production**

*Production refers to outcomes of livestock cultivation business in the form of meats, eggs, and milks.*

157. **Livestock Meat Production**

*Meat production is a carcass resulting from livestock slaughtered plus edible offal during a certain period and in a certain region.*

158. **Poultry Egg Production**

*Egg production is the production of livestock poultry eggs (native chicken, quail, duck and Muscovy duck) during a certain period, including those that are hatched, damaged, traded, consumed, and given to others.*

159. **Broiler Meat Production**

*The production of broiler meat is a volume of chicken meat production (Ton / Kg) calculated based on data on the number of DOC Final Stock (FS) broiler breed chickens reported by the breeding company, distributed to each province that lived and having lived cultivated for a year using technical parameters nationally. Technical parameters are as follows :*

- 95% life force or 5% depletion
- Harvested living weight 1.72 Kg
- Carcass conversion 70%

160. **Layer Egg Production**

*The production of layer egg is the volume of egg production produced from the productive parent population (starting at 19 weeks until cull), distributed to provinces that living and having lived cultivated during certain maintenance periods using national calculation parameters. Technical parameters are as follows :*

## KOMPONEN 2 SUMBER DAYA LINGKUNGAN DAN PENGGUNAANNYA

- Depleksi kumulatif 14%
  - Masa produksi 19-90 minggu
  - Tingkat produksi tiap 1.000 ekor induk produktif menghasilkan telur 817 butir/hari
  - Bobot telur rata-rata 64,1 gram
  - Jumlah satuan butir tiap 1 kg telur setara 15,6 butir
161. **Produksi Susu**  
Produksi susu adalah jumlah air susu yang keluar dari sapi betina selama satu tahun, termasuk yang diberikan kepada pedet/anak sapi, rusak, diperdagangkan, dikonsumsi, dan diberikan kepada orang lain.
162. **Pengeluaran dan Pemasukan Ternak**
  - Pengeluaran dan pemasukan ternak mencakup ternak besar (sapi, kerbau, dan kuda), ternak kecil (kambing, domba, dan babi), ternak unggas (ayam dan itik), dan komoditi hasil ternak (daging, telur ayam, telur itik, susu, dan kulit).
  - Pengeluaran dan pemasukan ternak menggambarkan dinamika pengeluaran dan pemasukan ternak yang terjadi di suatu wilayah. Hal ini perlu untuk diketahui guna menghitung neraca pemasukan dan pengeluaran ternak, sehingga wilayah/provinsi tersebut bisa dikategorikan sebagai wilayah yang defisit, swasembada atau surplus.
163. **Ekspor dan Impor Ternak**
  - Data ekspor-impor diperoleh dari hasil pengolahan data ekspor-impor yang dikeluarkan oleh Badan Pusat Statistik (BPS).
  - Data ekspor-impor Komoditas Subsektor Peternakan dan Kesehatan Hewan berdasarkan Petunjuk Teknis Cakupan Kode HS (*Harmonized System*) Pertanian Tahun 2022 yang terdiri dari 339 Kode HS.
  - Data ekspor-impor dikelompokkan dalam beberapa jenis komoditas/ternak, sehingga diperlukan pengelompokan *Harmonized System (HS)* yang sejenis.
- Cumulative depletion/Hen Housed 14%
  - Production period 19-85 weeks
  - The production rate of each 1,000 productive parents produces 814 eggs per day
  - Average egg weight 60.17 grams
  - The number of units of grains per 1 kg of eggs is equivalent to 16.62 grains
161. **Milk Production**  
*Milk production is the production of fresh milk in the form of a female animal within a certain period, including those that are given to their babies, damaged, traded, consumed and given to others.*
162. **Livestock Export and Import**
  - Livestock export and import include large livestock (cattle, buffaloes, and horses), small livestock (goats, sheep, and pigs), poultry (chickens and ducks), and livestock product commodities (meat, chicken eggs, duck eggs, milk, and leathers).
  - The livestock export and import indicates the dynamics of livestock export and import that occurs in a region. This needs to be known in order to calculate the livestock import and export balance, so that the relevant region/province could be categorized as either deficit, self-sufficiency or surplus region.
163. **Livestock Export and Import**
  - The export-import data were obtained from the processing of export-import data issued by BPS-Statistics Indonesia.
  - Export-Import Data for Livestock and Animal Health Sector Commodities based on Technical Guidelines for HS (*Harmonized System*) Agricultural Code Coverage in 2022 consisting of 339 HS Codes.
  - The export-import data are grouped into several types of commodities/livestock, so that a grouping of similar Harmonized System (HS) is required.
